I profusely thank Prof A.H. Rajasab, my supervisor for having accepted me as his PhD student in the Department of PG Studies and Research in Botany, Gulbarga University, Kalaburagi. Prof Rajasab was a great mentor, collaborator and a senior respected professional. I’m fortunate that Prof Rajasab, was not hesitant to look at my age, and experience in considering as one of his students after due process of tests. I sincerely thank Drs. G.M. Vidyasagar, Pratima Mathad, and Srinath Rao, and my genuine appreciations to Shri Sharanappa B. and colleagues in Prof Rajasab’s Lab, Department of PG Studies and Research in Botany, Gulbarga University, Kalaburagi for their timely support, and advice. My sincere thanks are also due to Prof X.B. Yang, Iowa State University. Also, thanks are due to Drs. Carl Bradley and Reuter-Carlson Ursula, Dept. of Crop Sciences, University of Illinois at Urbana-Champaign, Illinois, USA for providing Septoria glycines culture under USDA permit.

Thanks to Prof Ravi Hunje, Seed Technology Dept., UASD, RM Biradar an Agriculturist, and RB Patil a businessman, Kalaburagi, for their timely support. Thanks to Mark Storr and Gary Schmitz of BASF chemical company, North America for providing fungicide product samples and partial funding support of this research. Also thank P. Jones, APT, Minnesota, United States for providing microbial carrier sample. Thanks are also due to funding support of several industries either directly or indirectly including Iowa Soybean Association who has partly funded my salary.

Thanks to Prof Harry Horner, Tracey Stewart and Randall Den Adel, Microscopy and NanoImaging Facility, Iowa State University (ISU) for their help in processing samples on light and Scanning Electron Microscopes, and Margaret Carter, Image Analysis Facility, Office of Biotechnology, ISU for helping in measurements of area under colony growth using ImageJ software. Thanks to Chase Mayers, of Prof Tom Harrington’s Lab, Plant Pathology and Microbiology, ISU for his expertise in processing biocontrol agents for molecular identification and interpretations. Thanks to Huynh, T., Graduate student, Divya Navi, and several student employees, farm managers of ISU for their support in data collection and planting and harvesting.

Last but not the least profuse appreciations for continued support and cooperation of my wife Prathibha and children Deepak (26) and Divya (22), and my brothers and sisters.

Shrishail S. Navi
