ACKNOWLEDGEMENT

It is a privilege on my part to express my deep sense of gratitude to my reverend guide, **Prof. (Late) A.K. Nag Chaudhuri**, Division of Pharmacology, Department of Pharmaceutical Technology, Jadavpur University, for his excellent and able guidance, endless encouragement, freedom, stupendous co-operation, care and moral support he had extended to me right from the onset of the project until the penultimate day of his eventful life. It was a misfortune on my part to lose such an enthusiastic and competent guide at a critical juncture of the project. May his some rest in peace.

It would have been an end of the road for me had I not received the timely support from **Dr. Tuhinadri Sen** during the time of this crisis. I will forever remain deeply indebted to **Dr. Tuhinadri Sen**, for making this unlikely thing possible with great zeal. **Dr. Sen**, who is like a friend, philosopher and guide to me, provided necessary confidence and sustained inspiration to complete this uphill task with his continuous constructive criticisms and valuable suggestions. The impact of his unique leadership extends beyond our official relationship to the very inner self of my life where his contribution in shaping my personality and intrinsic quality has made me resilient to conquer the complexities of a highly stressful industrial career. Above all with his gentle smile, marvelous humor and witty words, he made the laboratory a great place to work at.

I take this opportunity to express my sincere thanks to Prof. Bishanth Sa, Head, Dept. of Pharmaceutical Technology, and Prof. S. K. Sanyal, Vice Chancellor, Jadavpur University for their kind support. I would also like to thank Prof. A. N. Basu, the former Vice Chancellor of Jadavpur University, for his kind help and assistance. The cooperation I received from all the other faculty members of this department is gratefully acknowledged.

I express my sincere thanks to my labmate Mr. Sanmoy Karmakar, Mr. Samir Samanta, Mr. Dipan Adhikari, Mr. Arnab Datta, Mr. K.T. Manisenthil, Kumar, Zothanpuia, Bapi Gorain, Ms. Lavanya, Ms. Prava and Ms. Amrita.
I like to extend my gratitude to my friends Dr. L. Manikandan, Mr. Rajib Barik, Tapas Kundu, Kuntal Maiti, Uttam Mondal and Falguni for their help and support.

I would specially like to thank Dr. Suchandra Sen and Dr. S. Pal for their valuable suggestions during the preparation of my thesis. I will be failing in my duty if I do not extend my heartfelt thanks to the National Tea Research Foundation, Kolkata, for providing me the financial support. I sincerely acknowledge the help I received from the authorities of the IICB, Kolkata.

I am greatly obliged to my parents and family members for their blessings and constant encouragement.

Last but not the least, the debt I owe to different persons associated directly or indirectly with my project work, whose names have not been mentioned here, can never be repaid in full. Finally, I express my deepest gratitude to the innocent laboratory animals for their supreme sacrifice.

Dilip Kumar Roy
