1. CHAPTER - I - Introduction
   Educational and National objectives (1-6)
   Education and Modernization (7-10)
   The Nature of Science (10-13)
   The Nature of Science Education (13-20)
   The Nature of Chemistry and Chemistry Education (20-21)
   Need and Significance of the Study (22-40)
   Statement of the Problem (40)
   Scope of Study (40-43)
   Limitations (43-44)

2. CHAPTER - II
   Some International Curricular Experiments in Chemistry and the Associated Teacher Education Structures 45-107
   A. International Curricular Experiments.
      The Pioneering Reforms in the U.S.A. (49-52)
      UNESCO's Contribution (63-65)
      Adaptive and Innovative Efforts in other countries (65-92)
   B. Teacher Training for Chemical Education (93-107)

3. CHAPTER - III
   A Review of Conceptual and Research Literature Relating to Chemistry Education 108-206
   A. Psycho-Pedagogical Structures and the teaching learning of Chemistry. (109-110)
      Ausubel and some Ausubelians (110-130)
      Kornhauser on some investigative and Structuring approaches (131-206)
4. CHAPTER IV - Methodology

- Tools (213)
- Schedule (214)
- Attitude Scale (216)
- Construction of the present Attitude Scale (220)
- Reliability and Validity (221)
- The Questionnaire to Teachers (222)
- Curricular Item Rating Scale (225)
- Textbook Analysis (227)
- The Rationale of the choice of Universe/Population - Textbook Analysis (228)
- Curricular Item Rating Scale (231)
- Questionnaire Covering actual Conditions (232)
- The Schedule (233)
- The Sample (235)
- Validity and Reliability (236)

5. CHAPTER V

- Results of Analysis of Textbooks over different periods (238)
- The Bank ground (239)
- Unit II: Nature of things (245)
- Unit III: Chemical effects of electricity (245)
- General Features of the Textbooks of 1961 (250)
- The 1967 Revision (250)
- The Revision of the 1970s (250)
- Revision of Mid 1980s (250-319)
6. **CHAPTER VI**

   Results Based on Survey Tools
   Attitudinal Facilitations and Hindrances
   Analysis of Total Scores in the Attitude Scale
   Statistics pertaining to total sample
   Conceptual Facilitations and Hindrances: Results of Analysis of Schedule Returns
   Ratings of Key Concepts and Topics in Chemistry Syllabus on certain Facilities/Hindrance Dimension
   Availability of Environmental Resources
   Environmental Dimension
   Procurement of Instruments
   Feasibility to do Experiments
   Practical Work Dimension

   7. **CHAPTER VII - Conclusion**

   Some Recommendations
   Suggestions for Further Research

   BIBLIOGRAPHY

   APPENDICES
