

LIST OF TABLES

Table 1.1	Doctors' Workforce Statistics in Maharashtra state	12
Table 3.1	Overview of Research Methodology of the Study	53
Table 3.2	List of all Variables of the Study	59
Table 3.3	Sample Size Covered from Public and Private Hospitals of Nashik and Mumbai cities	62
Table 3.4	Scoring Pattern on Doctors' WLB (DrWLB) Sub Scale	64
Table 3.5	Scoring Pattern on Factors of Doctors' WLB (DrWLB_Fact) Sub Scale	65
Table 3.6	Scoring Pattern on Doctors' Job Satisfaction (DrJS) Sub Scale	66
Table 4.1	Number of participating Doctors from Nashik and Mumbai cities	73
Table 4.2	Respondents Demographic Profile related Personal Factors	74
Table 4.3	Correlation Matrix of WLB and Personal Demographic Characteristics	75
Table 4.4	Respondents Demographic Profile related Professional Factors	76
Table 4.5	Correlation between DrWLB and Professional Demographic Characteristics	77
Table 4.6	Results of Factor Analysis - Rotated Component Matrix	80
Table 4.7	Number of Respondents Scoring on different categories of DrWLB scale	82
Table 4.8	Minimum and Maximum Scores Obtained on WLI and LWI Scales	83
Table 4.9	Comparative Mean Scores on Work to Personal Life Intrusion (W_PLI) Measured on Seven Point Likert Scale	85
Table 4.10	Comparative Mean Scores on Work to Family Life Intrusion (W_FLI) Measured on Seven Point Likert Scale	86

LIST OF TABLES

Table 4.11	Comparative Mean Scores on Work to Social Life Intrusion (W_SLI) Measured on Seven Point Likert Scale	87
Table 4.12	Comparative Mean Scores on Life to Work Competency Intrusion (L_WCI) Measured on Seven Point Likert Scale	89
Table 4.13	Comparative Mean Scores on Life to Work Achievement (L_WAI) Intrusion Measured on Seven Point Likert Scale	90
Table 4.14	Comparative Mean Scores on Life to Work Motivation Intrusion Measured on Seven Point Likert Scale	91
Table 4.15	Minimum and Maximum Scores Obtained on WLS and LWS Scales	92
Table 4.16	Comparative Mean Scores on Work to Personal Life Support (W_PLS) Measured on Seven Point Likert Scale	94
Table 4.17	Comparative Mean Scores on Work to Family Life Support (W_FLS) Measured on Seven Point Likert Scale	94
Table 4.18	Comparative Mean Scores on Work to Social Life Support (W_SLS) Measured on Seven Point Likert Scale	95
Table 4.19	Comparative Mean Scores on Life to Work Competency Support (L_WCS) Measured on Seven Point Likert Scale	97
Table 4.20	Comparative Mean Scores on Life to Work Achievement Support (L_WAS) Measured on Seven Point Likert Scale	98
Table 4.21	Comparative Mean Scores on Life to Work Motivation Support (L_WMS) Measured on Seven Point Likert Scale	98
Table 4.22	Minimum and Maximum Scores Obtained on DrWLB_Fact Sub scale	99
Table 4.23	Comparative Mean Scores on Factors of Doctors' Work Life Balance (DrWLB_Fact) Measured on Seven Point Likert Scale	100
Table 4.24	Number of Respondents Scoring on different categories on DrJS Scale	105
Table 4.25	Minimum and Maximum Scores Obtained on DrJS Scale	106

LIST OF TABLES

Table 4.26	Comparative Mean Scores on ‘Intrinsic Job Factors’ Measured on Seven Point Likert Scale	108
Table 4.27	Comparative Mean Scores on ‘Extrinsic Job Factors’ Measured on Seven Point Likert Scale	110
Table 4.28	Comparative Mean Scores on ‘Positive Affect’ Measured on Seven Point Likert Scale	112
Table 4.29	Comparative Mean Scores on ‘Negative Affect’ Measured on Seven Point Likert Scale	114
Table 4.30	Correlation Matrix of the all the Variables	116
Table 4.31	Results of Hypothesis H1 and Sub hypotheses H1a to H1d testing	116
Table 4.32	Multiple Regression with Affective Job satisfaction (AJS) as Criterion Variable and Doctors’ Work Life Balance (DrWLB) as Predictor	118
Table 4.33	Multiple Regression with Doctor’ Work Life Balance (DrWLB) as Criterion Variable and Int_Fact and Ext_Fact as Predictors Variables	119
Table 4.34	Percentage of Respondents Preferring Work Life Balance Programs in Hospitals	125
Table 4.35	Respondents’ Preference for Various Work Life Programs in Hospitals	126
Table 4.36	Doctors’ Preference to Achieve Better Work Life Balance	128
Table 4.37	Respondents Opinion on Work Life Balance	129
Table 4.38	Respondents’ Intention to Leave the Hospital	129
Table 4.39	Respondents’ Satisfaction with Choice of Profession	130

LIST OF TABLES in ANNEXURE 'A'

Table A1	Cronbach Alpha Coefficients, Skewness and Kurtosis Values for all variables of the Study	201
Table A2	Kaiser Meyer Olkin (KMO) and Bartlett's test	202
Table A3	Multiple Regressions with Affective Job satisfaction (AJS) as Criterion Variable and Doctors' Work Life Balance (DrWLB) as Predictor	202
Table A3.1	Model Summary for Regression in table A3	202
Table A4	Multiple Regressions with as Doctors' Work Life Balance (DrWLB) Criterion Variable and Cognitive Job satisfaction (CJS) as Predictor	203
Table A4.1	Model Summary for Regression in table A4	203
Table A5	Multiple Regressions with Doctor's Work Life Balance (DrWLB) as Criterion Variable and Cognitive Job satisfaction (CJS) as Predictor	203
Table A5.1	Model Summary for Regression in table A5	204
Table A6	Multiple Regressions with Affective Job satisfaction (AJS) as Criterion Variable and Cognitive Job satisfaction (CJS) as Predictor	204
Table A6.1	Model Summary for Regression in table A6	204
Table A7	Multiple Regression with Affective Job satisfaction (AJS) as Criterion Variable and DrWLB and CJS as Predictors	204
Table A7.1	Model Summary for Regression in table A7	205
Table A8	Moderated Multiple Regression –Relationship between DrWLB and CJS Moderated by City Type	205
Table A8.1	Model Summary for Regression in table A8	205
Table A9	Moderated Multiple Regression – Relationship between DrWLB and CJS Moderated by Hospital Type	206
Table A9.1	Model Summary for Regression in table A9	206
