

ACKNOWLEDGEMENTS

Foremost, I am grateful to God for the strength, wisdom, grace and ability to do this work.

I am thankful to Savitirbai Phule Pune University (SPPU) for all the support and assistance extended from start to end of my PhD journey.

I express my thanks to JDC, Bytco Institute of Management and Research, Nashik and the Research Head for having shown confidence in me and giving me an opportunity to pursue this PhD course at their research centre.

In full gratitude, I would like to acknowledge and sincerely thank my advisor and guide, Dr Rajashree Gujarathi for her tremendous support, expertise and mentorship. I thank her for encouraging my research and for allowing me to grow as a research student.

My sincere appreciation goes to Dr Sarita Aurangabadkar for helping me through all the stages of PhD. Her encouragement and support was extremely valuable.

I show my utmost gratitude to all the doctors, who despite their busy schedule; filled up the questionnaires and shared their time, experience and insight; that has greatly assisted this research. This research study was not possible without their participation and willingness. I am thankful to Indian Medical Association, Nashik for their support towards this research. Thanks to all those Medical Service Representatives from Nashik and Mumbai who assisted with data collection. Thank you for your contribution and time.

A special thanks to my parents and all family members. I would have never been able to finish my research without their unceasing encouragement, support and attention.

In the end, I am deeply indebted to all those who have been a part, direct or indirect; of this challenging and interesting endeavor of mine.
