ACKNOWLEDGEMENT

Working as a Ph.D. student at Amity Institute of Biotechnology, Amity University Uttar Pradesh was a magnificent as well as challenging experience for me. The work described in this thesis would not have been possible without the necessary facilities provided by Amity University and financial support by Department of Science and Technology, New Delhi. In all these years, many people were instrumental directly or indirectly in shaping up my academic career. It was hardly possible for me to thrive in my doctoral work without the precious support of these people. Here is a small tribute to all of them.

“When you pray and you ask for something, believe that you have received it and you will be given what you have asked for”. First of all I humbly thank Almighty God, for everything in life. The good and the bad. Some were blessings and some were lessons. I’ll never be able to thank him enough for always being there for me.

Secondly, I wish to express my heartfelt appreciation and deep sense of gratitude to my supervisor Dr. Nupur Sinha, Assistant Professor (III), Centre for Medical Biotechnology, Amity Institute of Biotechnology, Amity University Uttar Pradesh for introducing me to the world of research. It was only due to her valuable guidance, cheerful enthusiasm and ever-friendly nature that I was able to complete my research work in a respectable manner. I thank her for having rendered her esteemed, praise worthy guidance with interest and constant encouragement throughout the course of study and supervision provided in the execution of this thesis. I would also thank her for being inspirational, and teaching me the importance of curiosity using it as the driving force behind research. Her attitude of making serendipitous observation and converting them to new possibilities, correlating ideas and understanding the obvious has helped me come a long way and will always guide me in future.

I’m very grateful to my co-supervisors Dr. Pawan K. Maurya, Amity University and Dr. Mausumi Bharadwaj, Institute of Cytology & Preventive Oncology (Now, National Institute of Cancer Prevention and Research), ICMR and my S.R.C. members Dr. Pratima Chaudhuri and Dr. Nidhi Srivastava both from Amity University for their regular thought-provoking inputs and novel ideas, helping me throughout my research and

completion of thesis objectives. I thank them for their constant motivation, inspiration and support during the course of my thesis.

I express my gratefulness to Dr. Pranav Dorwal, Department of Pathology, Medanta- The Medicity, Gurgaon for giving me an opportunity and providing me a platform to carry out some of my work at their esteemed hospital. I also extend my gratitude to Ms. Rajni for helping me in carrying out my experiments there.

I’m extremely grateful to Mr. Kapil Bandil, PhD student, Vaccine Lab, Division of Molecular Genetics and Biochemistry, Institute of Cytology and Preventive Oncology (Now, National Institute of Cancer Prevention and Research), ICMR for helping me carry out some of my experiments under him. I also thank him for his invaluable time, guidance and constant encouragement during my period of stay there. I also thank Ms. Upma Sharma and Mr. Rajeshwar Patle, other PhD students in the same lab for helping me with my experiments.

I express my heartfelt gratitude and thanks to Dr. Chanderdeep Tandon, Director, Amity Institute of Biotechnology, Amity University Uttar Pradesh and Dr. Deepshikha Pande Katare, Assistant Director & Centre Head, Centre for Medical Biotechnology, Amity Institute of Biotechnology for their invaluable guidance and constant encouragement.

I would like to express my deep sense of gratitude to Dr. K.C. Upadhyaya, Advisor, Amity Institute of Biotechnology, Dr. P.K. Paul, Deputy Director, Amity Institute of Biotechnology, Dr. Sabari Ghosal, Professor, Amity Institute of Biotechnology, Prof. S.N. Raina, NASI Scientist, Prof. Shoma Paul Nandi, Research Coordinator, Amity Institute of Biotechnology and all Research Committee members for their interest and critical comments during the process of presentation of my long abstract.

I wish to thank Mrs. Vijay Narang, Mrs. Sushma R. Kunwar, Mr. Ishwar Singh, Mr. Ashutosh Kumar, Mr. Sudhir Singh, all the faculty and staff members of Amity Institute of Biotechnology and administration for their co-operation throughout my work.

~ ii ~
I’m indebted to my seniors Dr. Sadhna Sinha, Dr. Charu Thapliyal, Mrs. Anupama Awasthi and Dr. Ashish Kumar Gupta, my fellow lab-colleagues and my friends Ms. Pooja Murarka, Ms. Supriya Srivastava, Ms. Uzma Khanam, Ms. Mahak Tiwari, Ms. Shikha Upreti and Ms. Manisha Bhatnagar for their moral boosting kinship and constant support. Thank you all so much for always listening, trusting, supporting and encouraging me in my hardest times.

‘The love of a family is life’s greatest blessing’. I express my deepest sense of gratitude to my Parents, my Brother Divye, standing by my side supporting me and my whole-hearted respect and regards to my Grandparents for showering their heavenly blessings on me, and for their constant inspiration, sacrifices and wishes. You nurtured, protected and taught me with great care. I want to thank you all for being there and for your never ending love and support.

Date: Deepti Dua
