Acknowledgments

As I key in these words to acknowledge the help received by me in submitting this doctoral thesis, I find myself up against an arduous task to limn an entire life in a couple of pages. Though I doubt the ability of words to efficiently translate the feelings, I will try my best to do myself some justice. First of all, I am thankful to the Almighty for bringing forward the life, each day, the way He does. Down on earth, I have many whom I need to thank for many reasons.

It was my good fortune to have found Prof. Neera Bhalla Sarin, as my supervisor. The years spent under her tutelage and care will remain etched in my memory for ever. I express my sincere gratitude and regard for her scientific advice, encouragement and thoughtful care.

I am thankful to Prof. RNK Bamezai, Dean, School of Life Sciences, and all the former deans for providing the necessary facilities in the school.

I take this opportunity to thank all the faculty members of the school and the neighboring research institutes for sharing their wisdom at different times, on various foras. I am specially thankful to Dr. Gorango Mukhopadhyaya, SCMM, Prof. Santosh Misra, University of Victoria, Canada, Prof. PK Yadava, SLS for some fruitful discussions. I also humbly thank Prof. SK Sopory and SC Maheshwari for going through the manuscript of my paper and providing some valuable comments.

I am grateful to the CIP staff Mr. Alexander, Mr. Khan, Mr. Mishra for their help at all times. Dr. SP Sharma has been very kind in many ways. I thank Mr. Saini for taking the photographs for thesis, and Mr. Ginti for taking care of the plants in the garden. Safiragram had been a great help in the glass house. I also thank the office staff at SLS, especially Meenu madam for her student friendly nature.

HPLC experiments took me to places! I thank Prof. Syed Akhtar Hussain, Jamia Millia Islamia, Prof R Madhubala, SLS, and Prof. Udit Pati, CBT for kindly allowing me the use of their instruments. I am indebted to Mayur, Prasad, Dr. Nihat, Mr. Rais, Amit and Prabha for actually sitting with me while the HPLC runs were on.

If words were to fail, they definitely will, as I thank Drs. Azhar Aziz and Khatib. With them, helping me from day one at JNU, the place was never alien to me for a day.

The feeling of homesickness, at times, faded with my relatives in Delhi always being there behind me. I thank Prof. MH Qureshi, Najma phuphi, Suhail bhai, Asma appi, Shehla and Farhan for providing me the feeling of being at home. With Saqib, Masood bhai and Saud around I had always been confident of my ownself.

It has been my good luck to have classmates as helpful, caring, hardworking and intelligent as I had. I still remember my first day in the lab and my acquaintance with Dr. Versha Raja. The scientific temperament she exudes is worth imbibing. I have always looked up to my seniors in the lab Drs. Prasanna, Rekha Bisht, Varisai, Thiru, Muthusamy, and Mukesh. Mukeshji set me on tracks with my work, with his hard
earned experience. The present postdocs in the lab, Drs. Meetu and Neeti have always been forthcoming to help, with a smile. I am extremely thankful to each and every member of my lab namely, Manoj, Prem, Suchandra, Divya, Shalu, Chandrama, Anjana, Pawan, Sanjay, Prerna, Nishakant, Prem Jr., Naresh and Subash ji for their cheerful company. Each one of them is a unique gem that I feel good to have known for all these years. The badinage I shared with Ravi and Nasser was a rejuvenating break from the scientific thoughts! Thanks a lot, to all the MSc project students in the lab, Imtiyaz, Gautam, Pyniar and Deepak for bringing youthfulness to the lab. Nidhi and Selvi were always there for support during their stint in the lab. Thanks to Prem for his ideas and untiring work to realize them. I hope success is round the corner. This thesis would have taken some other shape had it not been for Pawan spending a sleepless night.

I owe many thanks to my friends in the school namely Dheeraj, Gopal, Ali, Dinesh, Raju, Naseem, Rajkumar, Anil, Aadesh, Ashraf, Sawarkar, Rana, Himanshu, Irfan, Kamal, Sanjay, Tariq, Ratnakaran and Prasad and Saurabh from CBT. Thanks to Ansuman and Manju for help at a critical hour. Many thanks to Preeti, Bimala, Amar and Pallavi for their ever-readiness to help.

I am extremely privileged to have great friends when the institution of friendship is talked to be crumbling. I feel ostentatious in having friends like Anand, Moon, Saini, Vijay, Anurag, Ashish, Kavita, Minhaj, Veenu, Shweta, Ajay, and Mahima. Their altruism has always been there without asking for.

I thank Murad for his brotherly love and for being my eyes and ears to the world outside the lab, during all these years of Ph.D. work, I don’t have words for thanking my friends Drs. Javed, Moosa, Kshirsid, Javed, Waqar and Gulshan.

With nostalgia, I remember my alma mater, the Spring Dale School in Lucknow, to which I will owe any academic acclaim that I may ever happen to chance upon. I am indebted to Dr. KK Trivedi for kindling in me the fire of love for the biological sciences and Ms. Shobha Pandey, who was sincerity personified and exemplified.

Finally, I am left with no adjectives when it has come to the turn of thanking my family. Well, this is the safest bet of not being castigated and getting frowned looks for not being thankful. I am, what I am, thanks to Abbu, Ammi, Khala, Appi, Bhaiya and all my relatives near or separated by physical miles.

Finally, Money Matters!! Thanks to UGC for monetary help in the form of JRF and SRF and to CSIR (grant no. 38/1126/05/EMR-11) for funds and SRF.

Mohd. Aslam Yusuf
