

## List of Figures

Figure No.	Title	Page No.
3.1	Stages and variables for agriculture supply chain analysis	32
3.2	Framework for ICT Adoption	35
4.1	Flow of Sampling Frame	41
5.1	State-Wise Irrigation Coverage 2008-09.	50
5.2	Average Size (Ha) Of Holdings As Per Different Agriculture Census (For All Size Groups)	51
5.3	Production And Distribution Of Certified Seeds in India	52
5.4	Consumption Of Fertilizers in India	53
5.5	Information Exchange Between Extensions And Farmers in India	56
5.6	ATMA Model As Per the Revised Guidelines (2010)	58
5.7	Percentage of Farmers' Households Accessing Information through Selected Sources	63
5.8	Top Four States in India: Farmer Households Accessing Information on Modern Agricultural Technology through Extension Worker by States.	65
5.9	Top Four States in India: Farmer Households Accessing Information on Modern Agricultural Technology through Input Dealers By States	66
5.10	Farmer Households Accessing Information on Modern Agricultural Technology through Mass Media and their Frequency of Contacts.	67
5.11	Two Ways Specialized and Farmer Specific Sources	68
5.12	Two Ways Specialized and Farmer Specific Sources	69
5.13	Access to Information From Most Accessed Sources of Information Across Farm Sizes in India (Percent)	71
5.14	Agricultural Supply Chain Information Flow	73
5.15	Stages of the Agricultural Production Process and Information Needs	74
5.16	Stages of Agriculture Decision Making Process	74
5.17	Types of Agricultural Information	75
6.1	Development of ICTs	79
6.2	Evolution of Information Sources to Farmers	80
6.3	Duration of Projects	89
6.4	ITC e-Choupal Information Flow	97
6.5	Lifeline Model and Information Flow	99
6.6	CSC Model and Information flow	101
6.7	TKS Model and Information flow	104

7.1	Quality Responses by Sources at Planning Level of Decisions	120-21
7.2	Quality Responses by Sources at Input Level of Decisions	123-24
7.3	Quality Responses by Sources for Cultivation Decisions	127
7.4	Quality Responses by Sources for Post-Harvest Decisions	130
7.5	Quality Responses by Sources for Marketing & Distribution Decisions	131
8.1	Distribution of Models According to Service Provision by Number of Activities for Various Stages of Agricultural Supply Chain (Within Group of Two)	142
