ACKNOWLEDGEMENTS

At this juncture of my journey towards acquiring the PhD degree, I take this opportunity and liberty to be nostalgic and try to put my feelings for everyone involved with this work into words.

First and foremost, I would like to thank my supervisor and guide Dr. N. Madhusudhana Rao for allowing me to work in his laboratory and giving me enough freedom. I would also like to extend my gratitude to CCMB and especially to Dr. Lajji Singh for providing state-of-the-art facilities and resources without which it would not have been possible to carry out this work. I am extremely thankful to the whole Instrumentation team of Shekhar, Asha, Vanaja, Lora, Bapiraju and many others for keeping the instruments in the 'right' condition always. The co-operation extended by other central facility staff: Nagesh for sequencing, Kishore for fine biochemicals, Giridharan for digital imaging, Prakash and his group for Xerox and Divakar for library is greatly appreciated.

My seniors in CCMB helped me put the right steps during the initial stages and gave the right direction to this work. I owe a lot to my senior Priyamvada, whose advices I value the most and with whom I shared some beautiful days in the laboratory. Prasad always provided me with an entirely different perspective on any issue that I used to discuss with him and Rajni always had a patient ear for all my woes. Talking to Manjula Reddy about any problem under the sun would reduce the sheer magnitude of the problem and solutions became obvious.

My past and present lab mates Vijaya gopal, Vijayalakshmi, Ramdas, Srilatha, Jennifer, Ravikanth, Vinod always provided a lively atmosphere in the lab & especially Rukkumani who will always remain as my special friend. I am also thankful to Venuji, Syedji and Ehsanji for providing all the glassware, plasticware and other necessary lab items.

My batch mates and friends Saloni, Amit, Waseem, Vijay, Soumi, Prabhu, Venkat reddy, and Jyotsna helped me pull through a lot of difficult times. My juniors Jobby, Tirumal, Shoeb, Zahid, Abhay, Faiz, Bhairab, Dev, Arvind, Poornima, have made the last few years of my stay memorable with all their affectionate and kind gestures. I would specially like to mention the names of Tirumal, Zahid and Abhay with whom I have spent hours discussing
innumerable topics and also for helping me in my thesis work extensively. I thank Zahid for sharing with me his FLASH DRIVE and ideas arising out of that. I thank Abhay for nothing else but being my 'SON' always.

West wing first floor will always be cherished for all the special memories attached with it. All the members of west wing first floor are gratefully acknowledged. I doubt if I can ever have so much fun along with work as much as I had on west wing first floor. It is indeed very distressing to leave the floor and all the fun filled corridor sessions!

I would also like to thank all the great souls of Wednesday Club and DTEAR K. Puram for believing in me. Also, CSIR is gratefully acknowledged for the financial support.

Finally, I would like to thank the life support system of my family members. My mother's optimism & belief in me and father's encouragement always helped me propel forward. My brothers Murthy and Krishna, and my sister Aparna have been ideal siblings and their wholehearted support in all my endeavors is a great source of strength. I would also like to thank my father-in-law and mother-in-law, Bhanu Sriram, Rama didi and jeejaji, my brothers-in-law and their wives. My husband Sridhar deserves a special mention for being always there and teaching me the fine nuances of life and the 'how to live happily' technology. Behind every successful endeavour of mine, lies his unstinted support and encouragement. I consider myself extremely lucky to have such a wonderful person as a husband.
