ACKNOWLEDGEMENTS

It is a great pleasure on my part to express my hearty gratitude to my supervisor Dr. B. Kamaiah who initiated me into research and imparted all necessary training for which this thesis could be completed in time.

I sincerely thank Prof. M. Atchi Reddy, Head, Department of Economics and Prof. T. R. Sharma, Dean, School of Social Sciences for providing a conducive research environment.

I am thankful to Dr. Ganti Subrahmanyam, Professor, NIBM, Pune, for his valuable suggestions in the initial stages of my work. I also thank Dr. B. K. Bhoi, Director, DEAP, RBI and Dr. M. Ramachandran for their comments to improve upon the work.

My thanks are due to Professor Hal R Varian, University of California, Berkeley for sending me some of his important papers and the software routine NONPAR which enabled me to carry out the separability tests.

Professor Julio J Rotemberg, Sloan School of Management also sent some of his papers which clarified my doubts on aggregation theory. Timely response from the Federal Reserve Bank of St. Louis, Bank of Canada, Bank of Japan and Federal Reserve Bank of Dallas helped me in updating the literature survey.

My friends Amanulla, Allen, Mohsinda, Pratap bhai, Gir bhai, Selvam, Soubhagya, Pankaj, Ranjan, Anurag, Ghanasyama, Ananda, helped and encouraged me throughout my research work. I shall remain indebted to them.

I also thank the staff, Department of Economics, computer centre for their help.
