I INTRODUCTION	1
II REVIEW OF LITERATURE	5
III MATERIAL AND METHODS	12
IV OBSERVATION	
(1) DEVELOPMENT AND GROWTH OF FACIAL NUCLEUS	
A. Human Foetus	23
B. Human Adult	41
C. Monkeys-Macaca radiata (Bonnet monkey) foetus, newborn and adults	49
(2) COURSE OF FACIAL NERVE IN THE ADULT MONKEY	72
(3) EXPERIMENTAL - ON MACACA RADIATA	
A. Facial Nucleus labelled by DiI	74
B. Facial Nerve Transection	76

SECTION		PAGE No.
V	DISCUSSION	
	(1) DEVELOPMENT AND GROWTH	100
	A. Migration	100
	B. Angle of Orientation	101
	C. Length of the Nucleus	104
	D. Subdivisions	105
	E. Cell Morphology and Morphometry	108
	F. Myelination	111
	(2) COURSE OF FACIAL NERVE IN MACACA RADIATA	111
	(3) EXPERIMENTAL	
	A. Location of Facial Nucleus by use of Tracer	112
	B. Nerve Transection Effects in the Facial Nucleus	113
VI	SUMMARY AND CONCLUSIONS	120
VII	APPENDIX	131
VIII	REFERENCES	141

LIST OF FIGURES

FIGURE No.	PARTICULARS	PAGE No.
1	Location of facial nucleus	15
2	Position of facial nucleus	17
3	Reticule superimposed over the neurons of the facial nucleus	18
4	Sections of pons showing facial nucleus a & b 8 weeks	24
5	Sections of pons showing facial nucleus a. 12 weeks; b. 14 weeks	25
6	Sections of pons showing facial nucleus a. 16 weeks; b. 18 weeks	26
7	Sections of pons showing facial nucleus a. 20 weeks; b. 24 weeks	27
8	Sections of pons showing facial nucleus a. 28 weeks; b. 32 weeks	28
9	Section of pons showing facial nucleus 36 weeks	29
10	Facial nucleus - Angle of orientation during human foetal development	30
11	Caudocranial reconstruction of the right facial nucleus, abducent nucleus and spinal nucleus of trigeminal at various stages of human foetal development	31
12	Length of facial nucleus at various stages of human foetuses	33
13	Neurons of facial nucleus a. 8 weeks; b. 12 weeks; c. 16 weeks	35

FIGURE No.	PARTICULARS	PAGE No.
14	Neurons of facial nucleus a. 20 weeks; b. 24 weeks; c. 32 weeks	37
15	Neurons of facial nucleus 36 weeks	38
16	Myelination gliosis - 16 weeks	39
17	Average neuronal diameter of the facial nucleus at various stages of human foetal development	40
18	Neuronal density per mm ³ of the facial nucleus at various stages of human foetal development	43
19	Neuronal volume per mm ³ of the facial nucleus at various stages of human foetal development	45
20	Neuronal surface area per mm ³ of the facial nucleus at various stages of human foetal development	47
21	Subdivisions of human facial nucleus - CFV stain	48
22	Subdivisions of human facial nucleus - Golgi stain	48
23	Facial nucleus - glial cells	50
24	a) Transverse sections through pons to show the size of the pons at the level of facial nucleus in the foetal, newborn and adult monkeys b) Photomicrographs showing the size and arrangement of nerve cells in the facial nucleus of the foetal, newborn and adult monkeys	51
25	The size and position of the facial nucleus in the monkey drawn by projection of transverse sections through pons passing at the level of maximum size of the nucleus	51
		54

FIGURE No.	PARTICULARS	PAGE No.
26	Sections of pons showing the position of facial nucleus in bonnet monkey	56
27	Reconstruction of facial nucleus in bonnet monkey	56
28	The craniocaudal length of the subdivisions of facial nucleus	57
29	Neuronal number, volume and surface area in the subdivisions of facial nucleus in foetal, newborn and adult stages of bonnet monkey	59
30	Neuronal number, volume and surface area at the cranial, middle and caudal levels of facial nucleus in foetal, newborn and adult stages of bonnet monkey	60
31	Typical neurons within the various subdivisions of facial nucleus in adult bonnet monkey (a-e)	68
32	a) Fibers within the pons region at the level of facial nucleus	70
	b) Neurons within the facial nucleus and the neuropil	
	c) Neuronal morphology and the glial processes within the facial nucleus	71
	d) Neurons with their processes and blood vessels within the facial nucleus	
33	Course of the facial nerve in bonnet monkey (a-e)	73
34	Facial nucleus labelled with DiI (a-e)	75
35	a) Face of a normal bonnet monkey	77
	b) Paralysis seen after 6 months of nerve transection	77

FIGURE No.	PARTICULARS	PAGE No.
36	Effects of retrograde reaction on 2nd post operative day a) Neuronal swelling b) Neuronal adhesion	79
37	On 4th post operative day a) Glial reaction at the synaptic terminals of dendrites b) Neuronophagia	80
38	Vasodilation and the infusion of vascular elements within the facial nucleus 2 days after facial nerve transection	82
39	2 days after nerve transection a) Microglial activation b) Neuronal aggregation	83
40	9 days after facial nerve transection a) Glial aggregation b) Naked nucleus c) Degenerating cytoplasm after the extrusion of cell nucleus d) Macrophages after the process of neuronophagic destruction	84
41	a) Aggregation of normal neurons b) Dispersed neurons showing degeneration	85
42	14th post operative day a) Formation of nuclear cap b) Multipolar cell with centrally placed nucleus and aggregations of Nissl substance	86
43	21 days after nerve transection a) Variation in the normal cytoarchitectonic plan b) Glia filling the area of degenerated neurons c) Grouping of cells being attempted	87
		88

FIGURE No.	PARTICULARS	PAGE No.
44	a) 42 days after nerve transection	89
	b) 60 days after nerve transection	
	c) 120 days after nerve transection	90
	d) 180 days after nerve transection	
45	a) Variation in the staining intensity of neurons 120 days after nerve transection	91
	b) Strange neuronal morphology and reorganised connections - 6 months	
46	a) Vasodilation and destruction of blood vessel wall - 14 days	94
	b) Initiation of reconstruction of vascular lumen 28 days	
	c) Reorganised vascularity - 60 days	
	d) Complete endothelial lining - 120 days	
47	Contralateral facial nucleus	96
	a) After 2 days of unilateral nerve transection	
	b) After 4 days of unilateral nerve transection	
48	Changes in the proximal stump of facial nerve after various post nerve transection periods (a-f)	97
49	Changes in the distal stump of facial nerve	
	a) Cross section	98
	b) Longitudinal section	
	c) Destroyed muscle fibres, nerves and neuromuscular junctions	99
50	Variation in the craniocaudal length of facial nucleus in relation to the body weight of the animal	106

LIST OF TABLES

TABLE No.	PARTICULARS	PAGE No.
1	Details of the surgery	21
2	Summary of the quantitative parameters of the facial nucleus at various stages of human foetus	34
3	Average number counts of neurons to estimate the neuronal density within the facial nucleus during human foetal development	42
4	Average point counts of neurons to estimate the neuronal volume within the facial nucleus during human foetal development	44
5	Average intercept counts of neurons to estimate the neuronal surface area within the facial nucleus during human foetal development	46
6	Average relative size of pons in the foetal new born and adult stages of bonnet monkeys in transverse sections	52
7	Average relative size of facial nucleus in the foetal, new born and adult stages of bonnet monkey in transverse sections	52
8	Average distance from various landmarks surrounding the facial nucleus at the cranial, middle and caudal levels in the foetal, newborn and adult stages of bonnet monkey	53
9	Neuronal diameter of the facial nucleus in bonnet monkey	58
