ACKNOWLEDGEMENTS

I thank you God for giving me the strength, patience and courage to complete this mammoth task.

I was lucky to have Dr. Batra as my guide; Sir, your knowledgeable insight, guidance, and constant encouragement has helped me immensely to complete this task and taught me much about how science is done. It was a wonderful learning experience for me to work in your lab, one that I will cherish forever.

I thank Dr. A. Surolia, Director of NII and Dr. S. K. Basu, ex-Director and Professor Emeritus, for giving me the opportunity to work at such a prestigious scientific institute.

I also take this opportunity to thank the members of my Doctoral Committee, Dr. C. Shaha, Dr. D. Mohanty, Dr. S. Vrati and Dr. Bhatnagar (ICGEB) for their constructive suggestions and critical appraisal during the progress of my Ph. D. work at NII. I am thankful to Drs. V. Bal, to Dr. C. Shaha and Dr. A. K. Panda for letting me use their lab facilities whenever I needed it.

A sincere thank you to Kewal for his immense technical help, especially in protein purification; and for tying countless dialysis bags! Thanks also to Jagdishji for his quiet support, ensuring that work always proceeded smoothly no matter what. A big thank you to all my labmates who made life in the lab really enjoyable. Thanks to my lab seniors Shveta and Divya for teaching me my way around the lab. I greatly appreciate Deepa’s chirpy company, and it has also been fun working with Punya, Narayani, Anubha, Anup and Rakesh.

Thanks to Sundarji for sequencing innumerable samples, and to Babulal and Satish for giving final shape to this thesis.

My stay at NII would not have been half as memorable had it not been for the really good friends I made here in the last few years. Divya, Sanchita, Neetha and Pooja, I have had a really wonderful time in your company, and will always appreciate your companionship and help during my Ph.D. days.

As I complete this thesis, I keep thinking of my mother. Ma, you left us eleven years ago, but will always be there in my memories.

Last, but not the least, I am grateful to my dear father for always being there for me and supporting and encouraging me throughout these Ph.D. days with his love and affection. You have been an immense source of strength, and I simply cannot find the words to thank you enough.
