LIST OF TABLES

Table 4.1: Global employment elasticities along demographic lines
Table 4.2: Employment Elasticity (1972-73 to 2011-12): CAGR Approach
Table 4.3: Compound Annual Growth Rate of Employment for male and female work-force (1983 to 2009-10) from various rounds of NSS EUS
Table 4.4: Percentage distribution of Usually Employed by Status of Employment (Regular/Wage Salaried) for NSS 38th round (1983) to 68th round (2011-12)
Table 4.6: Percentage distribution of male and female workers in Work Force Participation (WFPR) for Rural and Urban areas, according to usual status, usual principal and subsidiary, current weekly and current daily statuses during NSS 50th(1993-94), 55th(1999-2000), 61st (2004-05), 66th (2009-10) and 68th (2011-12) rounds
Table 5.1: Workforce Participation Rates-Usual Principal and Subsidiary Status (UPSS), in percentage.
Table 5.2: Labour Force Participation (in percentage) 1993-94 to 2011-12
Table 5.3: Gender Gap in Rural Labour Force Participation Rate (in percentage), 2004-05 to 2011-12
Table 5.4: Pair t-test of the significance of gender gap in employment for the 61st round (2004-05)
Table 5.5: Pair t-test of the significance of gender gap in employment for the 68th round (2011-12)
Table 6.1: Descriptive Statistics of the Independent Variables
Table 6.2: Logit Estimates (Odds-Ratio) of the determinants of labour-force participation of women workers, 15-59 years, Usual Principal Status

Table 6.3: Results (Odds-Ratio) of logistic regression for women workers (15-59 years), 2011-12 according to Usual Principal Status

Table 7.1: Odds ratios explaining female participation (61st round)

Table 7.2: Odds ratios explaining female participation (68th round)

Table 8.1: Percentage distribution of workers by status in employment, all ages (UPSS), (1999-2000 to 2011-12)

Table 8.2: Distribution of female workers across land ownership classes and type of Employment

Table 8.3: Trend in Female Employment among Socio Religious Groups across Land Ownership Classes

Table 8.4: Proportions of the key independent variables

Table 8.5: Marginal Effects of Multinomial Probit Model for Women Workers

Table 9.1: Results of Multinomial Logistic Regressions of Women Workers (15-59 Years) In Rural Areas, (Relative Odds) showing the probability of participation in home based unpaid work, domestic work or extended domestic work

Table 9.2: Regions and States

Table 9.3: Landholding And Unpaid Work--All India for the 68th round (2011-12)

Table 9.4: Share of female workers in domestic work, extended domestic work and Unpaid Family Work in Total Unpaid Work

Table 9.5: Results of Multinomial Logistic Regressions Of Women Workers (15-59 Years) In Rural Areas, (Relative Odds) for 2004-05 (61st round)

Table 9.6: Results of Multinomial Logistic Regressions Of Women Workers (15-59 Years) In Rural Areas, (Relative Odds) for 2011-12 (68th round)
