Acknowledgement

Despite being the sole author of this thesis, by no means the sole contributor. Many people have contributed directly or indirectly to this thesis, to my education, and to my life, and this is the only opportunity to thank them.

First and foremost, I would take this opportunity to express my sincere and profound gratitude to my supervisor Dr. Uma Roy, for her keen interest and constant encouragement throughout my research training. I respect her vast knowledge and vision for the subject, which always reflected in this study. I have been lucky to work under her unique guidance that develops a sense of sincerity and self-confidence.

With great respect and gratitude, I thank Dr. P.K. Roy for his constant encouragement, valuable suggestions and co-operation that he had shown throughout the course of this study. Without his blessings the work would not have been accomplished.
