Acknowledgments

Since this may be the only opportunity to thank these individuals, who inspired and
helped me in my journey of life, I may be a bit more verbose in my thanks.

First and foremost with high regards and profound respect, I would like to express
my deep sense of gratitude to my Ph.D. supervisor, Professor Satrajit Adhikari for his
excellent guidance and constant encouragement throughout my research work and in-
troducing me to this fascinating realm of non-adiabatic chemistry. The experience that I
gained in working with him through his suggestions, comments and even critiques will
help me in all my future ventures.

My sincere respect to all my collaborators, Professor Michael Baer and his group, Pro-
fessor Debasis Mukhopadhyay, Professor Pinaki Chaudhuri, Dr. Rahul Sharma and Dr.
Anita Das for their scientific insights, which enriched our collective endeavor.

I express my heartfelt thanks to the seniors in my lab, especially, Dr. Amit Kumar
Paul, Assistant Professor, NIT Silchar, Assam, who passed the baton of Beyond Born-
Oppenheimer project of our group to me. In my earlier days of Ph.D. he introduced
the subject to me and shared his valuable experiences, suggestions that helped me to
understand this rich field of research. I also wish to thank Dr. Subhankar Sardar, Assistant
Professor, Bhattaro College, West Bengal and Dr. Tapas Sahoo, Post-doc Fellow, Weizmann
Institute of Science, Israel for many fruitful discussions and their cordial help in computer programming. My present lab mates, Sandip, Souvik, Bijit and Joy have extended all their support to me in every possible ways. It has been a great pleasure to work with them in my lab.

I would like to express my thanks to all my IACS-friends, specially, Sourav Mishra, Sirshendu, Basudeb da, Ramprasad da, Sk. Sabyasachi da, Nirmalya, Arnab, Aporajeyo, Koushik, Swarnajit, Sourav, Gaurab and many more for bearing with me during my stay in IACS. As long as I am writing names down, I especially convey my regards to Kanchan da, Sabya da, Shamu da, Partha, Saikat Basu, Tanmoy, Kali and Suvankar for spending their valuable time with me. Those long sleepless nights will be unforgettable.

I take this opportunity to express my sincere respect to all my teachers, starting from my school, Patha Bhavana to my College, Siksha Bhavana, Visva Bharati University. I am highly grateful to Professor Pranab Sarkar and Professor Bidhan Chandra Bag of my university for their constant encouragement and motivation that guided me to join Ph.D.

No words can express my indebtedness to Patha Bhavana and everything associated with my school. Patha Bhavana presents “Tagoreana” to the world, after the name of Gurudeb Rabindranath Thakur, which is a blessed practice in celebrating the philosophy of life.

da, Papri and many more. My juniors, Rajdeep, Mani, Prasenjit, Tania, Sabya, Anindita, Tameyo, Nitin become my extended family members; thank you all for your cordial help in my need. Indeed, it is a difficult task to mention all of them here. I acknowledge from the bottom of my heart each and every one of them, whoever associated with me for their contribution in my life.

It takes immense pleasure in thanking my family in this very occasion. I am glad to believe that I am constantly receiving the blessings of my grandfathers in every steps of my life. I would like to express my deep appreciation from the core of my heart to my parents and sister for their unconditional love, care and support without which life would have appeared pale. My parents are the role model to me in living life with honesty and simplicity. A special acknowledgement for my one and only childish elder sister, otherwise she will be unmanageable. Next, I am thankful to my wife, Satabdi, whose constant support and encouragement helps me throughout my highs and lows. It is really tough to bear with me and I often treat you as my emotional punching bag. Thank you very much for allowing me with all my histrionic syndrome. I wish to thank my extended family members for their warm hospitality, especially, my chotomama, for being one of my good friends.

Finally, financial support from the INSPIRE program of Department of Science and Technology (DST), Government of India, is gratefully acknowledged. Thanks to Indian Association for the Cultivation of Science (IACS) for financial and administrative support.

Saikat Mukherjee
