CONTENTS

SYNOPSIS

LIST OF TABLES

LIST OF FIGURES

LIST OF ABBREVIATION

CHAPTER-1

INTRODUCTION

1.1 Advancement in Concrete Technology ..................... 1
1.2 Biomineralogy..................................................3
1.3 Effect of Microorganism on Concrete.......................4
1.4 Scope and Objective of the Research......................5
1.5 Structure of the Thesis.......................................6

CHAPTER-2

LITERATURE REVIEW

2.1 Introduction...................................................7
2.2 Harmful Effects of Microorganism in Concrete...........7
2.3 Beneficial Effects of Microorganism in Concrete .........12
2.4 Research Significance .......................................19

CHAPTER-3

EXPERIMENTAL INVESTIGATION

3.1 Introduction...................................................20
3.2 Objectives....................................................20
CHAPTER-4

RESULTS AND DISCUSSION

4.1 General ..........................................................43
4.2 Compressive Strength of Mortar.................................44
4.3 Compressive strength of Concrete...............................52
4.4 Split Tensile Strength..........................................57
4.5 SEM Analysis....................................................61
4.6 Image Analysis..................................................61
4.7 Mercury Intrusion Porosion Test.................................62
4.8 X-ray Diffraction Analysis......................................83
4.9 Ultrasonic Pulse Velocity and Water Absorption Test ...89
4.10 Limitations of Study .........................................89
CHAPTER-5

CONCLUSION AND SUGGESTION FOR FUTURE STUDY

5.1 Conclusion…………………………………………………………..94
5.2 Suggestion for Future Studies……………………………...96

REFERENCES ……………………………………………………………..98
