# CONTENTS OF THE THESIS

Acknowledgements vi
List of papers vii

## CHAPTER-1
INTRODUCTION

1.1 Introduction to subject 2
1.2 Definitions of reliability 3
1.3 Concepts, terms and definitions 5
1.4 Failures 8
1.5 Redundancy 9
1.6 Some useful distributions 10
1.7 Maintenance actions 11
1.8 Stochastic processes 13
1.9 Reliability analysis 16
1.10 Work contained in 16

## CHAPTER-2
STOCHASTIC BEHAVIOUR OF SUGAR PLANT WITH 2-OUT-OF-3:F BOILERS AND PRE-EMPITIVE RESUME REPAIR

2.1 Introduction 24
2.2 Assumptions 25
2.3 List of notations 25
2.4 Formulation of mathematical model 28
2.5 Solution of the model 28
2.6 Ergodic behaviour of the system 31
2.7 Particular case 32
2.8 Reliability and MTTF of the system 33
2.9 Availability of cosidered system 33
2.10 Numerical illustration 33
2.11 Results and discussion 34

## CHAPTER-3
AVAILABILITY ANALYSIS FOR NUCLEAR REACTOR WITH STANDBY REDUNDANT GENERATORS

3.1 Introduction 39
3.2 Assumptions 40
3.3 List of notations 41
3.4 Formulation of mathematical model 44
3.5 Solution of the model 45
3.6 Long-run behaviour of the system 48
3.7 Some particular cases 49
CHAPTER-7
ABILITY FORE CAST FOR DECOMPOSITION PROCESS OF
UREA MANUFACTURING USING ALGEBRA OF LOGICS

7.1 Introduction 104
7.2 Assumptions 104
7.3 List of notations 105
7.4 Formulation of mathematical model 105
7.5 Solution of the model 107
7.6 Some particular cases 109
7.7 Numerical computation 111
7.8 Conclusion 112

BIBLIOGRAPHY

B1 Some important books 115
B2 Research papers 123
