## Contents

### Chapter 1  Coumarins

1.1 Introduction, Nomenclature and Occurrence  01  
1.2 General methods for the synthesis of coumarins  02  
1.3 Reactions of coumarins  10  
1.4 Spectral properties of coumarins  14  
1.5 Heterocyclic substituted coumarins  18  
1.6 Heterocyclic fused coumarins  20  
1.7 Naturally occurring coumarins  23  
1.8 Medicinal and Industrial applications of coumarins  24  
1.9 Various drugs based on coumarins  31  
1.10 Summary of the present work  33  

References  37

### Chapter 2  Synthesis of pyrazolyl and benzofuranyl pyridyl substituted coumarins

2.1 Introduction  52  
2.2 Present Work  58  
2.3 Experimental  91  

References  100

### Chapter 3  Synthesis of dicoumarinyl substituted pyrazolyl pyridines

3.1 Introduction  104  
3.2 Present Work  107  
3.3 Experimental  139  

References  146

### Chapter 4  Synthesis of furoquinolinyl substituted Benzo[c]coumarins and [1,2,4]-triazolo-[3',4':2,3][1,3,4]thiadiazepino[7,6-b]coumarins
Section 1  Synthesis of furoquinolinyl substituted Benzo[c]coumarins

4.1 Introduction 148
4.2 Present Work 154
4.3 Experimental 177

Section 2  Synthesis of [1,2,4]-triazolo-[3',4':2,3][1,3,4]thiadiazepino[7,6-b]coumarins

4.4 Introduction 185
4.5 Present Work 187
4.6 Experimental 207
References 214

Chapter 5  Microwave assisted synthesis of coumarinyl pyrazolyl pyrazoline substituted coumarins

5.1 Introduction 220
5.2 Present Work 225
5.3 Experimental 271
References 282

Chapter 6  Antimicrobial activity

6.1 Introduction 286
6.2 Present Work 297
6.3 Experimental 298
6.4 Results 300
References 312
