ACKNOWLEDGMENTS

My heartfelt gratitude to my guide Prof(Dr) H.J.Jani who has always blessed me with unwavering support, who still believes in me and has reserves of patience. Sir has always been standing there as a lamp-post at many important junctions of my life. My professional breakthroughs are indebted to him.

This thesis would never have completed without the help of all professionals in the power sector and wind turbine industry. During questionnaire design process, I met and talked to a few top-level executives: Senior Executives of two wind turbine manufacturers, a senior professional in a power company, a finance manager and a company secretary of an Investor company. The survey questionnaire is a result of their deep insights. Executives of 50 plus companies came forward and helped by filling in the questionnaire, under conditions of not revealing their identity. It will be against research ethics to reveal their identity, hence I thank them all here.

I have received immense support from all the faculty members of G.H.Patel Institute of Business Management- Dr. Yogesh Joshi, Dr. Darshana Dave, Dr. R.P.Patel, Dr.P.K.Priyan, and Dr. Raju Rathod. Their insights helped me at all stages right from framing research proposal to questionnaire design to data analysis and to thesis writing. At each and every stage, guidance was available.

My special thanks to Prof G.Krishnamurthi and Dr M.C.Patel (Provost CHARUSAT: Charotar University of Science and Technology) for giving me opportunity to work as a faculty at the Indukaka Ipcowala Institute of Management. I would also like to express my thanks to my colleagues at CHARUSAT: Indukaka Ipcowala Institute of Management for their valuable help during my tenure. Thank you Dr.Govind Dave, Dr. Sujatha Krishnamurthy and Ms. Sheetal Thomas for providing valuable inputs through endless discussions. Thank you to CHARUSAT librarians Mr Yatin Talati and Mr Pramod Patel for helping me locate the required study material. I would also like to thank the librarian at G.H.Patel Institute of Management.
My husband Amit, daughter Astha and son Saumya have been pillars of support. They lift my spirits but keep me grounded. Without their support this would not have been possible. I thank you for keeping up with me.

Our parents are our gods on earth, I began losing them one by one during this process of research. My father-in-law, my father and then even my mother-in-law. My mother is critically ill now. My father would pursue me for research ever since I was schooling. That time I did not know what it was but he was such a visionary. My sincere gratitude to my parents who worked relentlessly for my studies and ensured that I got good education in the face of all odds.

I would also like to thank all the authors whose articles I have read in journals, newspapers, magazines, internet, books. Without all these information it was impossible to venture into research let alone fathom this subject. I have tried to give references for all the articles, quotes, figures, tables, equations, graphs etc taken from their works either as footnotes or in bibliography or both places. If any of the author/s is not properly refered to and credited for, it might be due to oversight and not deliberate. I am particulary thankful to the Danish Wind Industry Association web site, which helped a great deal in generating the flow of the literature review.

I once again thank everybody for their contributions.
