LIST OF PUBLICATIONS FROM THIS THESIS	v
LIST OF TABLES	vi
LIST OF FIGURES	viii
ABSTRACT	xi
<b>CHAPTER</b>	<b>PAGENO.</b>
1. INTRODUCTION	
1.1 Motivation and research tracks	1
1.2 Methodology - Mathematical modeling	5
1.3 Description of the thesis	6
1.4 Basic mathematical theory	11
1.5 Inventory analysis in a supply chain	18
1.6 Notations	27
2. LITERATURE REVIEW	
2.1 Trade credit financing	28
2.2 Delay product differentiation process	29
2.3 Logistics models under stochastic and fuzzy environments	30
2.4 Literature gaps	31
<b>PART - 1</b>	
3. ANALYSIS OF PARTIAL TRADE CREDIT FINANCING IN A SUPPLY CHAIN BY EPQ-BASED MODEL	
3.1 Introduction	33
3.2 Problem description	35
3.3 Mathematical models	36
3.4 Particular cases	45

3.5 Numerical examples and sensitivity analysis	49
3.6 Conclusion	52
<b>4. PARTIAL TRADE CREDIT FINANCING IN A SUPPLY CHAIN WITH PERISHABLE ITEMS, TWO WAREHOUSES AND PRICE DEPENDENT DEMAND</b>	
4.1 Introduction	54
4.2 Problem description	55
4.3 Model formulation	57
4.4 Existence of unique optimal cycle time ( $T$ ) when selling price ( $s$ ) is fixed	63
4.5 Decision rules to find the optimal cycle time when $s$ is fixed	66
4.6 Determination of optimal selling price for the given value of $T$	68
4.7 Computational analysis	71
4.8 Conclusion	77
<b>5. DOMINANT RETAILER'S OPTIMAL POLICY IN A SUPPLY CHAIN WITH PERISHABLE ITEMS UNDER ADVANCE PAYMENT SCHEME AND TWO-ECHELON TRADE CREDITS</b>	
5.1 Introduction	78
5.2 Problem description	81
5.3 Model formulation	82
5.4 Unique optimal solution $T^*$ when $\eta$ is fixed	89
5.5 Optimal policy $(\eta^*, T^*)$ when $\eta$ is endogenous	91
5.6 Numerical examples and managerial insights	96
5.7 Conclusion	100

6.	TWO-ECHELON TRADE CREDIT IN A SUPPLY CHAIN WITH PERISHABLE ITEMS WHEN DEMAND DEPENDS ON BOTH SELLING PRICE AND CREDIT PERIOD	
6.1	Introduction	101
6.2	Problem description	102
6.3	Model formulation	104
6.4	Solution procedures	109
6.5	Particular case	115
6.6	Computational analysis	117
6.7	Conclusion	126
7.	EVALUATION OF SUPPLY CHAIN STRUCTURES USING DELAY PRODUCT DIFFERENTIATION PROCESS	
7.1	Introduction	128
7.2	Problem description	129
7.3	Model formulation	131
7.4	Postponement and independent systems	137
7.5	Numerical examples	139
7.6	Conclusion	144
PART - 2		
8.	A TWO-ECHELON SUPPLY CHAIN WITH POISSON DEMAND AND STOCHASTIC LEAD TIME	
8.1	Introduction	145
8.2	Problem description	146
8.3	Approximations In the higher and lower echelons	150
8.4	Total cost of a two-level supply chain	152
8.5	Numerical results	153
8.6	Conclusion	160

9. A TWO-ECHELON SUPPLY CHAIN WITH POISSON DEMAND AND PARTIAL BACKORDERS	
9.1 Introduction	161
9.2 Problem description	162
9.3 Review of two special cases	163
9.4 Approximations in the lower and higher echelons	165
9.5 Total cost of a two-echelon supply chain	168
9.6 Numerical illustration	170
9.7 Conclusion	179
10. A TWO-ECHELON SUPPLY CHAIN UNDER FUZZY ENVIRONMENT	
10.1 Introduction	181
10.2 Modeling the supply chain system in an uncertain environment	186
10.3 Numerical examples	196
10.4 Conclusion	200
11. CONCLUSION	201
APPENDICES	203
