LIST OF TABLES

1.1: Nomenclature of CYP1A1 alleles
1.2: Nomenclature of CYP2E1 alleles
1.3: Predicted EPHX1 activity
1.4: Nomenclature of NAT2 alleles
2.1: Baseline characteristics of study subjects
2.2: Primers and probes used for genotyping CYP1A1 gene polymorphisms
2.3: Primers and probes used for genotyping CYP2E1 gene polymorphisms
2.4: Primers and probes used for genotyping EPHX1 gene polymorphisms
2.5: Primers and probes used for genotyping NAT2 gene polymorphisms.
3.1.1: Expected and observed genotypic count for CYP1A1 gene rs4646421 SNP
3.1.2: Expected and observed genotypic count for CYP1A1 gene rs1799814 SNP
3.1.3: Expected and observed genotypic count for CYP1A1 gene rs1048943 SNP
3.1.4: Distribution of genotypes and relation between polymorphisms of the CYP1A1 gene
3.1.5: Joint effects between CYP1A1 genotypes and smoking status
3.1.6: CYP1A1 gene haplotypes and oral cancer
3.2.1: Expected and observed genotypic count for CYP2E1 gene rs6413419 SNP
3.2.2: Expected and observed genotypic count for CYP2E1 gene rs3813867 SNP
3.2.3: Expected and observed genotypic count for CYP2E1 gene rs2031920 SNP
3.2.4: Distribution of genotypes and relation between polymorphisms of the CYP2E gene
3.2.5: Joint effects between CYP2E genotypes and smoking status.
3.2.6: CYP2E1 gene haplotypes and oral cancer
3.3.1: Expected and observed genotypic count for EPHX1 gene rs1051740 SNP
3.3.2: Expected and observed genotypic count for EPHX1 gene rs2292566 SNP
3.3.3: Expected and observed genotypic count for EPHX1 gene rs2234922 SNP
3.3.4: Distribution of genotypes and relation between polymorphisms of the EPHX1 gene
3.3.5: Joint effects between EPHX1 genotypes and smoking status
3.3.6: Paired Linkage Disequilibrium Statistics of EPHX1 Polymorphisms
3.3.7: EPHX1 gene haplotypes and oral cancer
3.4.1: Expected and observed genotypic count for NAT2 gene rs1799929 SNP
3.4.2: Expected and observed genotypic count for NAT2 gene rs1799930 SNP
3.4.3: Expected and observed genotypic count for NAT2 gene rs1799931 SNP
3.4.4: NAT2 gene polymorphisms and oral cancers
3.4.5: Joint effects between NAT2 genotypes and smoking status
3.4.6: NAT2 deduced phenotype in controls and oral cancer groups
3.4.7: Paired linkage disequilibrium statistics of NAT2 polymorphisms
3.4.8: NAT2 gene haplotypes and oral cancer
