CHAPTER I: Introduction

1.1. Discovery, structural properties and applications of phthalocyanines 1
1.2. General procedure for the synthesis of phthalocyanines 4
1.3. Mechanism of phthalocyanine formation 6
1.4. Electronic spectra of phthalocyanines 6
1.5. Electrochemical properties of phthalocyanines 9
1.6. Electrocatalytic properties of metallophthalocyanines 11
1.7. Determination of biomolecules by different methods 13
1.8. General methods of electrode modification 15
1.9. Importance of nanoparticles 24
1.10. Background and importance of biologically and chemically important compounds 25
1.11. MPcs modified electrodes for electrocatalytic applications 35
1.12. Electrocatalytic applications tetraaminometallophthalocyanines modified electrodes 39
### 1.13. Thiol, thiophenyl functionalized metallophthalocyanine modified electrodes

### 1.14. Metallophthalocyanine capped nanoparticles

### 1.15. Aim and scope of the work

### 1.16. References

### CHAPTER II: Experimental Section

CHAPTER III: Synthesis and Characterization of Amine, Thiol, Thiophenyl Functionalized Metallophthalocyanines

3.1. General preparation and mechanism of phthalocyanine formation 87
3.2. Synthesis of tetraamino metallophthalocyanines (M = Mn(III), Ni(II), Cu(II)) 88
3.3. Synthesis of tetra(thiolphthalocyanato)nickel(II) and tetra(hydroxythiophenyl) Co(II) phthalocyanine 94
3.4. References 106

CHAPTER IV: Fabrication of Thin Films of 4α-Cu\textsuperscript{II}TAPc on GCE for the Determination of L-methionine and Caffeine

4.1. Introduction 107
4.2. Electrochemical determination of L-methionine using the electopolymerized film of 4α-Cu\textsuperscript{II}TAPc on GCE 108
4.3. Electrochemical determination of caffeine in the presence of paracetamol using a SAM of 4α-Cu\textsuperscript{II}TAPc 122
4.4. Conclusions 139
4.5. References 141
CHAPTER V: Fabrication of Thin film on 4α-Ni\textsuperscript{II}-TAPc Modified GCEs and Their Electrocatalytic Activity Towards Nucleo Bases

5.1. Introduction 145

5.2. Electrochemical sensor for guanine using a SAM of 4α-Ni\textsuperscript{II}-TAPc on GCE 145

5.3. 4α-Ni\textsuperscript{II}-TAPc SAM modified GCE for the simultaneous determination of adenosine and adenine 156

5.4. Conclusions 170

5.5. References 172

CHAPTER VI: Synthesis, Characterization and Applications of SAMs of Thiol and Thiophenyl Functionalized MPcs on Au Surface

6.1. Introduction 175

6.2. Synthesis, characterization and application of peripheral thiol substituted nickel(II) phthalocyanine 176

6.3. SAM of 4β-Co\textsuperscript{II}-THTPhPc on Au electrode and its electrocatalytic activity dioxygen reduction 188

6.5. Conclusions 198

6.6. References 200

CHAPTER VII: Preparation, Characterization and Applications of 4α-MTAPcs Capped Gold and Silver Nanoparticles

7.1. Introduction 204
7.2. Synthesis, characterization and electrocatalytic application of non-peripheral amine substituted nickel(II) phthalocyanine capped gold nanoparticles

206

7.3. Synthesis of gold nanorods in solution and on ITO and Au substrates using 4α-NiTPATp as seed

223

7.4. Synthesis of non-peripheral amine functionalized manganese(III) phthalocyanine capped silver nanoparticles and their immobilization of electrode surface for the determination of nitrite

243

7.5. Conclusions

253

7.6. References

256
