ACKNOWLEDGEMENT

It could have not been possible to complete this study whose end product was a Ph.D. degree without the indulgence of the people associated closely or distantly, directly or indirectly. At this juncture, it is my moral obligation to express my sincere thanks and whole hearted appreciations for their involvement, contributions and successful completion.

In this regard, I would like to recognize the role of the people played by them in different capacity in sequential order of their inputs. Firstly, I express my deep sense of gratitude to my respected father Sri Chhakkoo Ram, (Retired Guard N. Rly.) who dreamed of making his son a “Doctorate”.
