ANNEXURE:

1. List of tables:

Table 1: Comparative data between the RDA levels (as per ICMR) and daily actual consumption of different food items in West Bengal and India

Table 2: Age wise comparison of RDA levels and daily actual protein, fat and energy intake levels

Table 3: Nutritive value of fresh jackfruit seeds and jackfruit seed flour

Table 4: Nutritive value of fresh seed kernel

Table 5: Mineral content of watermelon seed kernel flour

Table 6: Percentage of different classes of lipid and fatty acids in watermelon seed kernel

Table 7: Nutritive value of fresh drumstick leaves and shadow dried drumstick leave powder (100 g)

Table 8: Proportion of ingredients mixed to develop different Supplementary Formula (SF)

Table 9: Determination of edible portion after processing of ingredients:

Table 10.A: Comparison of energy content of freshly prepared Supplementary Formula A, B and C (in 100 gm)

Table 10B: One way ANOVA for comparison of energy content of SF A, SF B and SF C

Table 11A: Comparison of protein content of freshly prepared Supplementary Formula A, B and C (in 100 gm)

Table 11B: One way ANOVA for comparing protein content of SF A, SF B and SF C

Table 12A: Comparison of fat content of freshly prepared Supplementary Formula A, B and C (in 100 gm)

Table 12B: One way ANOVA for comparing fat content of SF A, SF B and SF C

Table 13A: Comparison of carbohydrate content of freshly prepared Supplementary Formula A, B and C (in 100 gm)

Table 13B: One way ANOVA for comparing carbohydrate content of SF A, SF B and SF C

Table 14A: Comparison of moisture content of freshly prepared Supplementary Formula A, B and C (in 100 gm)
Table 14B: One way ANOVA for comparing moisture content of SF A, SF B and SF C
Table 15A: Comparison of ash content of freshly prepared Supplementary Formula A, B and C (in 100 gm)
Table 15B: One way ANOVA for comparing ash content of SF A, SF B and SF C
Table 16A: Comparison of fibre content of freshly prepared Supplementary Formula A, B and C (in 100 gm)
Table 16B: One way ANOVA for comparing fibre content of SF A, SF B and SF C
Table 17A: Comparison of calcium content of freshly prepared Supplementary Formula A, B and C (in 100 gm)
Table 17B: One way ANOVA for comparing calcium content of SF A, SF B and SF C
Table 18A: Comparison of iron content of freshly prepared Supplementary Formula A, B and C (in 100 gm)
Table 18B: One way ANOVA for comparing iron content of SF A, SF B and SF C
Table 19: Comparison of nutritive value of SF D and SF E
Table 20: Mean scores obtained for different attributes of Supplementary Formulae
Table 21: Calculation of cost of SF-C, SF D and SF-E (Per 100 g)
Table 22: Composition and Nutritive value of Stock diet
Table 23: Nutritional composition of stock diet and experimental diets:
Table 24: Comparison of food and nutrient intake of control and treated group C:
Table 25A: Comparison of total feed intake (g) of control and treated groups:
Table 25B: ANOVA of total feed intake of control and treated groups:
Table 26A: Comparison of daily feed intake (g) of control and treated groups:
Table 26B: ANOVA of daily feed intake of control and treated groups:
Table 27A: Comparison of total protein intake of control and treated groups:
Table 27B: ANOVA of total protein intake of control and treated groups:
Table 27C: Comparison of daily protein intake of control and treated groups:
Table 27D: ANOVA of daily protein intake of control and treated groups:
Table 28A: Comparison of total fat intake (g) of control and treated groups:
Table 28B: ANOVA of total fat intake of control and treated groups:
Table 28C: Comparison of daily fat intake (g) of control and treated groups:
Table 28D: ANOVA of daily fat intake of control and treated groups:
Table 29A: Comparison of total carbohydrate intake (g) of control and treated groups:
Table 29B: ANOVA of total carbohydrate intake of control and treated groups:
Table 29C: Comparison of daily carbohydrate intake (g) of control and treated groups:
Table 29D: ANOVA of daily carbohydrate intake of control and treated groups:
Table 30A: Comparison of total iron intake (g) of control and treated groups:
Table 30B: ANOVA of total iron intake of control and treated groups:
Table 30C: Comparison of daily iron intake (g) of control and treated groups:
Table 30D: ANOVA of daily iron intake of control and treated groups:
Table 31A: Comparison of total energy intake (g) of control and treated groups:
Table 31B: ANOVA of total energy intake of control and treated groups:
Table 31C: Comparison of daily energy intake (g) of control and treated groups:
Table 31D: ANOVA of daily energy intake of control and treated groups:
Table 32A: Comparison of total calcium intake (g) of control and treated groups:
Table 32B: ANOVA of total calcium intake of control and treated groups:
Table 32C: Comparison of daily calcium intake (g) of control and treated groups:
Table 32D: ANOVA of daily calcium intake of control and treated groups:
Table 33: Comparison of growth pattern between C & TC
Table 34A: Comparison of initial weight (g) of control and treated groups:
Table 34B: ANOVA of initial weight of control and treated groups:
Table 35A: Comparison of final weight (g) of control and treated groups:
Table 35B: ANOVA of final weight of control and treated groups:
Table 36A: Comparison of total weight gain (g) of control and treated groups:
Table 36B: ANOVA of total weight gain of control and treated groups:
Table 37A: Comparison of food conservation efficiency (food intake/weight gain) of control and treated groups:
Table 37B: ANOVA of food conservation efficiency of control and treated groups:
Table 38A: Comparison of protein efficiency ratio (weight gain/protein intake) of control and treated groups:
Table 38B: ANOVA of protein efficiency ratio of control and treated groups:
Table 39: Comparison of liver weight and Liver function tests between C & TC:
Table 40A: Comparison of liver weight (g/100g body weight) of control and treated groups:
Table 40B: ANOVA of liver weight of control and treated groups:

Table 41A: Comparison of SGPT level (IU/L) of control and treated groups:
Table 41B: ANOVA of SGPT level of control and treated groups:

Table 42A: Comparison of SGOT (IU/L) level of control and treated groups:
Table 42B: ANOVA of SGOT level of control and treated groups:

Table 43A: Comparison of ALP level (KA Unit) of control and treated groups:
Table 43B: ANOVA of ALP level of control and treated groups:

Table 44: Estimated result of biochemical parameters

Table 45: Serum lipid profile of experimental animals

Table 46: Mean scores obtained for different attributes of SF 1 & 2
Table 47: Mean scores obtained for different attributes of SF 3, 4 & 5
Table 48: Mean scores obtained for different attributes of SF 6, 7 & 8

Table 49: Calculation of nutritive value of sweet powder (SF D1) per 100 gm of raw weight
Table 50: Calculation of nutritive value of salty powder (SF D2) per 100 gm of raw weight
Table 51: Calculation of nutritive value of khichri (SF D3) per 100 gm of raw weight
Table 52: Calculation of nutritive value of dal (SF D4) per 100 gm of raw weight
Table 53: Calculation of nutritive value of potato curry (SF D5) per 100 gm of raw weight
Table 54: Calculation of nutritive value of halwa (SF D6) per 100 gm of raw weight
Table 55: Calculation of nutritive value of laddu (SF D7) per 100 gm of raw weight
Table 56: Calculation of nutritive value of roasted rice flakes (SF D8) per 100 gm of raw weight
Table 57: Calculation of nutritive values of different recipes (in 100 gm fresh weight of edible food)

Table 58: Combinations of sample offered for tasting to each evaluator:
Table 59: Coding of combinations offered to each evaluator:
Table 60: Moisture content of stored sample:
Table 61: Pattern of response of sensory evaluation for observation of shelf life
2. List of graphs:

Graph 1: Percentage of powdered ingredient obtained after processing
Graph 2: Graphical representation showing mean energy content (kcal) of SF A, SF B, SF C, SF D and SF E
Graph 3: Graph showing mean carbohydrate, protein and fat content of SF A, SF B, SF C, SF D and SF E
Graph 4: Graphical representation of mean calcium content (mg) of SF A, SF B, SF C, SF D and SF E
Graph 5: Graphical representation of mean iron content (mg) of SF A, SF B, SF C, SF D and SF E
Graph 6: Column graph representing mean scores of different Supplementary Formula
Graph 7: Graphical representation of comparison of nutrient content of stock diet and experimental diets (per 100g):
Graph 8: Graphical representation of comparison of mean daily intake of protein, fat and carbohydrate between control and treated groups:
Graph 9: Graphical representation of comparison of mean daily intake of iron between control and treated groups:
Graph 10: Graphical representation of comparison of mean daily intake of calcium between control and treated groups:
Graph 11: Graphical representation of comparison of growth pattern between control and treated group C:
Graph 12: Graphical representation of comparison of mean initial weight and mean final weight between control group, treated group D and E:
Graph 13: Graphical representation of comparison of FCE and PER between control group, treated group D and E:
Graph 14: Graphical representation of comparison of liver weight (g/100 g of body weight) between control group, treated group D and E:
Graph 15: Graphical representation of comparison of SGPT and SGOT levels between control group, treated group D and E:
Graph 16: Graphical representation of comparison of different biochemical parameters between
control group and treated group E:
Graph 17: Graphical representation of comparison of haemoglobin level between control group and treated group E:
Graph 18: Graphical representation of comparison of lipid profile between control group and treated group E:
Graph 19: Comparison of attributes of different dishes:
Graph 20: Moisture content of stored sample:
Graph 21: Percentage of correct response received for C & R and C & A combinations

3. List of proformas:

Proforma 1: Proforma used for preliminary sensory evaluation
Proforma 2: Proforma used for sensory evaluation
Proforma 3: Proforma used for Triangle test

4. List of flow charts:

Flow chart 1: Experimental design
Flow chart 2: Processing of individual raw materials
Flow chart 3: Experimental design
Flow chart 4: Estimation of shelf life of SF E
