I would like to take this opportunity to acknowledge support, collaboration and encouragement from several people during my research tenure at S. K. Mitra centre for Research in Space Environment, Institute of Radio Physics and Electronics, University of Calcutta.

First of all, I wish to express my sincere gratitude to my advisor, Prof. Animesh Maitra. My experience of working as his scholar is an invaluable treasure. I could not have imagined a better mentor for my Ph.D. than him. Moreover, the family-like atmosphere in his group made my research life quite enjoyable. Actually, to a scholar he is much more than an academic advisor. His constant advice, encouragement and invaluable suggestions have guided me to find the right way in my research career.

I thankfully acknowledge the financial support provided by Space Application Centre, Ahmedabad & Indian Space Research Organization (ISRO) in terms of junior and senior research fellowship during the course of my of research work for completion of Ph.D thesis. My sincere thanks go to Dr. P. K. Pal, Programme Director, SAC, ISRO, for approving the project in which I was a research fellow. I am also deeply indebted to Dr. Vikas Patel, Project Manager, Space Applications Centre, ISRO for approving the extension of fellowship and contingent grant by two years after completion of the project to enable me to pursue the research activity.

Thanks are due to Prof. G. Ghosh, Prof. S. Kar and Prof. N.R. Das, the former and the present Head of the Institute, for the necessary administrative support. I would like to
extend my gratitude to all the faculty members of the Institute of Radio Physics and Electronics for their favourable assistance. I am also thankful to the Administrative staff, Academic staff and the Technical Staff of the Institute of Radio Physics and Electronics for helping me with their respective fields of expertise. My special thanks to Haripada Makhal for being so much supportive in the administrative processes. I would also like to thank my fellow group members, who helped to keep me focused and determined through the tough times. Thanks are expressed to Arpita Adhikari, Saurabh Das, Shamitaksha Talukdar, Swastika Mukhopadhyay, Soumyajyoti Jana, Thumree Sarkar and Upal Saha. I wish to convey my sincere appreciation to all the friends in the Institute of Radio Physics and Electronics for providing unforgettable company and moral support during different stages of my Ph.D. tenure.

Finally, I must thank all the members of my family for their enormous sacrifice to support me through all these years. But for my father’s support and encouragement I would have never achieved anything at all, and I must specially thank my wife Nilakshi for her immense patience and support. Thanks for walking beside me for the last few years, sharing the happy moments and challenges alike. I am blessed to be brought up in a great family that has always set a good example and provided me with unlimited support. It is their blessings and love that has brought me to this day that I can write an acknowledgement to my work. Words are too poor to express my gratitude to all of them.

The final words of thanks are due to those people whose names might be unsaid in this section but they were always with me and helped me to choose the right direction during the last few years.
