Acknowledgements

There are a lot of people whom I need to acknowledge, I shall start with the person who deserves it the most, my guide Dr. Snehasikta Swarnakar. Despite not having a fellowship of my own, she supported me financially throughout. She bore with me in difficult times, gave the necessary freedom to explore my ideas. Her meticulous corrections over every manuscript made research easy. Thank you madam, for your guidance, help and support, without which this thesis can never be completed.

I would like to give my thanks to Prof. Siddhartha Roy and Prof. Samit Chattopadhyay, the past and present directors of IICB, for granting me the privilege to continue my work in this esteemed institute. I would like to thank all IICB members for their effort. Thanks are also due to the Council of Scientific and Industrial Research, Government of India, for my project fellowship.

I am very much grateful to Dr. Pramathes Dasmahapatra for collaborating with us. I am thankful to Mr. Amlan K. Ray for supplying the human samples relentlessly throughout the years. I am very much obliged to the patients for agreeing to support our research.

I would like to thank all my seniors, past and present labmates for their support, and help. Special thanks goes to my friends and people at Department of Biochemistry, CU. I thank all those people of IICB for graciously loaning me reagents and help whenever needed.

I would like to thank my family for supporting me all these years.
