# TABLE OF CONTENTS

## INTRODUCTION

References 4

## CHAPTER 1

Theory of Atomic Structure Calculations

1.1 Theoretical Background 5
1.1.1 Central Field Approximation 6
1.1.2 Self Consistent Field Method 8
1.2 Hartree-Fock Atomic wave Function 8
1.3 Energy Integrals or Slater Integrals 10
1.4 Configuration Interaction 11
1.5 Methods of Calculations 12
1.5.1 Cowan Code 12
1.6 Transition Probabilities 15
1.7 Oscillator Strength 16
1.8 Isoelectronic Sequence 17
1.9 Determination of Ionization Potential 18

References 19

## CHAPTER 2

Experimental Details

2.1 Spectroscopic Light Sources 21
2.1.1 Sliding Spark Source 22
2.1.2 Three Electrode Source (Triggered Spark) 24
2.2 The Spectrograph 24
2.2.1 Normal Incidence Spectrograph 26
2.2.1.1 Recording of Indium Spectra at 3-m Normal Incidence Spectrograph 28
2.2.1.2 Recording of Indium Spectra at 10.7-m Normal Incidence Spectrograph 28
2.2.2 Grazing Incidence Spectrograph 29
2.2.2.1 Recording at Grazing Incidence Spectrograph 31
2.2.3 The 1.5-m Wadsworth Grating Spectrograph 31
2.3 Archival Data on Indium Ion 32
2.4 Reduction of the Spectrograms and Estimation of Uncertainty 33
2.5 The Ionization Separations or Line Identification 34
2.6 The Energy Level Optimization 35

References 36

CHAPTER 3 38-70
The Third Spectrum of Indium: In III

3.1 Level Structure of In III 39
3.2 Theoretical Calculations 42
3.3 Spectrum Analysis 42

3.3.1 The $4d^{10}5s\rightarrow[4d^{10}np]$ Transition Array 42
3.3.2 The $4d^{10}np$ ($n \geq 5$) – $[4d^{10}\{ns (n \geq 6) + nd (n \geq 5)\} + 4d^95s^2]$ Transition Array 43

3.3.3 The $4d^{10}(nf + ng + nh)$ Configurations 45
3.3.4 The $4d^95s5p$ Configuration 45
3.3.5 The $4d^95s(nf + np)$ Configurations 47
3.3.6 The $4d^95p^2$ Configuration 48

3.4 Optimization of the Energy Levels 49
3.5 Ionization Potential 49
3.6 Conclusion 50

References 51

CHAPTER 4 71-119
The Fourth Spectrum of Indium: In IV

4.1 Level Structure of In IV 72
4.2 Theoretical Calculations 76
4.3 Spectrum Analysis 76

4.3.1 The $4d^95p – \{4d^9ns (n=5-8), 4d^95d$ and $4d^85s^2\}$ Transition Array 76
4.3.2 The $4d^96d$ Configuration 79
4.3.3 $4d^8np$ (n=6, 7) and $4d^8nf$ (n=4-11) Configurations 79
4.3.4 The $4d^85s5p$ Configuration 80

4.4 Optimization of the Energy Levels 80
CHAPTER 5
The Fifth Spectrum of Indium: In V

5.1 Level Structure of In V
5.2 Theoretical Calculations
5.3 Spectrum Analysis
5.3.1 The 4p^6 4d^0 and 4p^6 4d^8 (np + nf) Odd Parity Configurations
5.3.2 The 4p^6 4d^7 5s5p and 4p^5 4d^10 Odd Parity Configurations
5.3.3 The 4p^6 4d^8(ns+nd) Even Parity Configurations
5.4 Optimization of the Energy Levels
5.5 Conclusion
References

CHAPTER 6
The Sixth Spectrum of Indium: In VI

6.1 Level Structure of In VI
6.2 Theoretical Calculations
6.3 Spectrum Analysis
6.3.1 The 4d^8 and 4d^7 (5p+5s) Configurations
6.3.2 The 4d^7(4f +6p) Configurations
6.3.3 The 4p^5 4d^9 Configuration
6.4 Optimization of the Energy Levels
6.5 Conclusion
References
