ACKNOWLEDGEMENTS

In a research of this magnitude, a student must draw upon the expertise of many stalwarts, colleagues and friends. This I have done. The scientific accuracy of this thesis must be shared with those individuals. Without fail, they constructively and enthusiastically responded to my queries and call for help. A mere listing of their names is a most inadequate expression of my indebtedness to them.

To my guide and supervisor Prof. Dr. S. P. Thyagarajan, M.Sc., Ph.D., M.D., D.Sc., Head, Department of Microbiology, Dr. ALM PGIBMS, Taramani, Madras -113, for his meticulous guidance, affectionate treatment, invaluable help and most of all for sharing his precious time with me.

My sincere indebtedness to my teachers Dr. T. Sundararaj, Dr. S. Ananthan, Dr. P. Rajendran, Dr. Thangam Menon, Dr. Usha Anand Rao and Dr. V. Jayapal for building me as a microbiologist.

I deem it a great privilege to thank sincerely and whole heartedly Dr. M. S. Krishnamoorthy, Director, Dr. ALM PGIBMS, Taramani, Madras-113 for all the support and permission granted to work in this Institute.

It is impossible for any one scientist, or even group of scientists, to remain fully informed of all the diverse development and to have all the infrastructure facilities. Then the researcher has no recourse, but to rely upon the skills, judgement of other scientists and usage of their lab facilities.
I was gratified that many people yielded to request for help and volunteered to help in areas germane to their particular area of interest. They are:

# Dr.P.Rajasambandam, Professor and Head, Dr.K.Raghuram, Addl.Professor, Dr.Sunil Mathew, Department of Gastroenterology, Chennai Medical College and Hospital ;Dr.K.R.Palaniswamy, Professor and Head, Dr.Murali, Dr.Usha Srinivas, Dr.Mathiazhagan, Faculty Members, Stanley Medical College, and Dr.Ramathilakam, Professor and Head, Dr.Jayanthi and Dr.Malathy, Department of Digestive health and diseases, Anna Nagar Peripheral Hospital, Madras for all their support in patient material and expert clinical opinion during the review meetings.

# Dr.S.K.Panda, Assoc.Professor, and his team of researchers Dr.S.K.Nanda, Dr.Ashwini Panigrahi, Mr.Israr, Dr.Hema, Ms.Sujatha and Ms.Alka, Department of Pathology, AIIMS, New Delhi, for sharing their expertise in the field of molecular biology, in the most amicable manner during the training period.

# Dr.Baba Krishnan, Professor and Head, and Mr.Manohar, Technical Asst., Department of Pathology for helping me in taking sections for the immunofluorescence study.

Dr.P.Venkatesan, Sr.Research Officer and Mr.ChandraShekar, Statistics Department, Tuberculosis Research Centre (ICMR), Madras, for their help in the statistical analysis of the data and to the Director Dr.Narayanan for granting permission for the same.
The quality of the manuscript and the time table for completion, could never have been realised without the help of my dear friends Mr.V.Gopalkrishnan, Mr.K.G.Murugavel, Mr.N.P.Pramod, Mr.R.Hari and Mr.Joyee. My thanks are due to all the other research scholars in the department who have been a constant source of encouragement.

My heartfelt thanks are to my seniors Dr.Elanchezhiyan, Dr.Udayasankar, Dr.G.Sridhar, Dr.Jayaram and Dr.Rauf Latif for all their help and support and most of all for being friends.

I have long been blessed with a loyal, dedicated and skilled faculty and technical staff, of the department of Microbiology, and my special thanks are due to Mr.K.Veeramani, Ms.Kownher, Ms.Geetha, Ms.Ramani and Ms.Kalai Selvi for the timely help.

Thanks to the one person, who doesn't need to be mentioned by name, whom I hold very special.

My profound gratitude to my family members for their patience, tolerance and all the care and hope that they had placed on me.

I would like to thank the Council for Scientific and Industrial Research (CSIR), New Delhi for the financial assistance during the tenure of my study.

I am conscious of the contribution made by the patients and volunteers involved in the study and that of many others whom I would have missed inadvertently.

K.V.K.MOHAN
