ACKNOWLEDGEMENTS

First and foremost I offer my sincerest gratitude to my supervisor, Prof. Gurcharan Kaur, Department of Biotechnology, Guru Nanak Dev University, Amritsar. Above all and the most needed, she provided me unflinching encouragement and support in various ways. Her truly scientist intuition has made her as a constant oasis of ideas and passions in science, which exceptionally inspire and enrich my growth as a student, a researcher and a scientist want to be. I am indebted to her more than she knows. It has been an honour to be her Ph.D. student. She has taught me, both consciously and unconsciously, how good experimental science is done. I appreciate all her contributions of time, ideas, and funding to make my Ph.D. experience productive and stimulating. She encouraged me to not only grow as an experimentalist but also as an instructor and an independent thinker. I am not sure many graduate students are given the opportunity to develop their own individuality and self-sufficiency by being allowed to work with such independence. The joy and enthusiasm she has for her research was contagious and motivational for me, even during tough times in the Ph.D. pursuit. I am also thankful for the excellent example she has provided as a successful person, scientist and professor.

At times, besides being mentor, she was a compassionate mother, loving sister and a caring friend when needed the most. For everything you’ve done for me, ma’am, I thank you.

I owe a great deal of appreciation and gratitude to Dr Roop Wadhwa and Dr Sunil C. Kaul, AIST, Japan who helped me to get trained in their institute. I would also like to thank them for their valuable inputs for research studies. My warm appreciation is due to all the students and staff of that lab, Dr. Nishant, Dr. Navjot, Dr. Ran, Dr. Didik, Dr. Nakamoto, Runani and Yaguchi San were very friendly and helpful in all the ways. I am thankful to Council of Scientific and Industrial Research (CSIR), India, for providing Junior and Senior Research Fellowship during the course of this study which buttressed me to perform my work comfortably. My sincere thanks to International Brain Research organisation (IBRO) for selecting me for IBRO-APRC exchange fellowship program which helped me learn a lot to enrich my experimental capabilities. I would like to acknowledge the financial, academic and technical support of the Guru Nanak Dev University, Amritsar and its staff for this research.

I would also like to thank some people from early days of my research tenure. Dr. Sandeep Sharma, Dr. Gyots Prakash and Mr Dinesh Lakhanpal were among those who kept me going at the beginning. A special mention of Dinesh Lakhanpal, for equipping me with the basics of cell culture techniques, constant moral support and discussions regarding research work. All the seniors in the group were the source of inspiration for me in my early days and who taught me many things. The group has been a source of friendships as well as good advice and collaboration. Special thanks to Mr. Sushil who was always there to accompany and help in long and tedious experiments throughout the period of study which helped me a lot to work for hours together tirelessly. I am also indebted to

my colleagues Rachana, Randeep, Harpreet, Amardeep, Ashutosh, Binderjit, Shiv, Santosh, Tanima, Harpreet, Iska, Pritika for their support and lending their ear to listen to me when I was in dire need to talk. I would also like to extend huge, warm thanks to my roommates, Avinash, Pankaj and Akshay. They were a valuable help and constant support. They were always there beside me during the happy and hard moments to push me and motivate me. Later days of PhD were more fun filled and joyful with the entry of Chandni, Vasundhara and Bharat. They were supportive, encouraging and helpful in their own ways. Thanks to the little deities for all your love, respect and care and making the PhD journey more passionate and comfortable.

I would also like to acknowledge the faculty members from my department Prof. Prabhjot Singh, Dr. P.K. Pati, Mr. P.K. Verma, Dr. Ramandeep Kaur, Dr. P.C. Mishra and Mr. Bhupesh Kumar for their support. I am also very thankful to staff members of the department including Mr. Suba Singh, Mr. Raksh Sharma, Mr. Shiv Kumar, Mr. Jasbir Singh, Mr Harbhajan Singh, Mr. Kewal Kumar, Daljit, Raksh Bhandari, Joddy, Sonu, Hardev and Gagan for helping me in their own way.

Where would I be without my family? My parents deserve special mention for their inseparable support and prayers. My Father, Mr. Mohinder Lal, in the first place is the person who put the fundamentals in my learning character, showing me the joy of intellectual pursuit ever since I was a child. My Mother, Satya Devi, is the one who sincerely raised me with her caring and gentle love. My deepest gratitude to my parents who have been the guiding force behind my achievements, their support and sacrifices behind my accomplishment can’t be put in words. I am very grateful to my family for all their compassionate love and encouragement and supporting me in all my pursuits. Lucky, Binder and Sarina, thanks for being supportive and caring siblings.

Words fail me to express my appreciation to my fiancée Harshita, whose dedication, love and persistent confidence in me, has taken the load off my shoulder. I owe her for being unselfishly let her intelligence, passions, and ambitions collide with mine. Therefore, I would also thank my in laws Mr. Surinder Chaudhary, Deepa Chaudhary and Nikita for their faith in me and providing me with unending encouragement and support.

Last but not the least, I would like to thank Dear Lord, the one above all of us, the omnipresent God. From the depth of my heart I express my deep sincere gratitude to the Almighty for the blessings he had bestowed upon me to do this work.

At the end of my thesis, it is a pleasant task to express my thanks to all those who contributed in many ways to the success of this study and made it an unforgettable experience for me.

Dated: June, 2012
