LIST OF FIGURES

Figure 3.1  Graphical representation of the inventory system.
Figure 3.2  The total cost function with respect to $\rho$ when $\theta$ follows uniform distribution.
Figure 3.3  The total cost function with respect to $\rho$ when $\theta$ follows triangular distribution.
Figure 3.4  The total cost function with respect to $\rho$ when $\theta$ follows beta distribution.
Figure 3.5  Total cost with respect to $\rho$ for different distributions of $\theta$.
Figure 3.6  Total cost with respect to $\rho$ and $T$ for different distributions of $\theta$.
Figure 4.1  Graphical representation of the inventory level.
Figure 4.2  Inventory level as a function of time for case 1 ($T \leq M$).
Figure 4.3  Inventory level as a function of time for case 2 ($t_i \leq M \leq T$).
Figure 4.4  Inventory level as a function of time for case 3 ($M \leq t_i \leq T$).
Figure 4.5  The total cost function with respect to $T$ when $\theta$ follows uniform distribution and $T \leq M$.
Figure 4.6  The total cost function with respect to $T$ when $\theta$ follows uniform distribution and $t_i \leq M \leq T$.
Figure 4.7  The total cost function with respect to $T$ when $\theta$ follows uniform distribution and $M \leq t_i \leq T$.
Figure 4.8  The total cost function with respect to $T$ when $\theta$ follows triangular distribution and $T \leq M$.
Figure 4.9  The total cost function with respect to $T$ when $\theta$ follows triangular distribution and $t_i \leq M \leq T$.
Figure 4.10 The total cost function with respect to $T$ when $\theta$ follows triangular distribution and $M \leq t_i \leq T$. 
Figure 4.11  The total cost function with respect to $T$ when $\theta$ follows beta distribution and $T < M$.

Figure 4.12  The total cost function with respect to $T$ when $\theta$ follows beta distribution and $t_1 \leq M \leq T$.

Figure 4.13  The total cost function with respect to $T$ when $\theta$ follows beta distribution and $M \leq t_1 \leq T$.

Figure 4.14  Total cost with respect to cycle length for different distributions of $\theta$ when $T \leq M$.

Figure 4.15  Total cost with respect to cycle length for different distributions of $\theta$ when $t_1 \leq M \leq T$.

Figure 4.16  Total cost with respect to cycle length for different distributions of $\theta$ when $M \leq t_1 \leq T$.

Figure 4.17  Total cost with respect to cycle length for different delay periods when $\theta$ follows uniform distribution.

Figure 4.18  Total cost with respect to cycle length for different delay periods when $\theta$ follows triangular distribution.

Figure 4.19  Total cost with respect to cycle length for different delay periods when $\theta$ follows beta distribution.

Figure 5.1  Graphical representation of the inventory level evolution.

Figure 5.2  The convexity of total cost function with respect to $\lambda$.

Figure 5.3  The total cost with respect to $\lambda$ and $\psi$.

Figure 6.1  Representation of the inventory system by graph.

Figure 6.2  Example 6.1: Total cost with respect to number of replenishment.

Figure 6.3  Example 6.1: Total cost with respect to number of replenishment when $\mu = 0$.

Figure 6.4  Example 6.2: Total cost with respect to number of replenishment.

Figure 6.5  Example 6.2: Total cost with respect to number of replenishment when $\mu = 0$.

Figure 6.6  Total cost vs. different values of $\theta$. 
Figure 6.7 Total cost vs. different values of $\delta$.
Figure 6.8 Total cost vs. different values of $\mu$.
Figure 6.9 Total cost vs. different values of $R$.
Figure 6.10 Total cost vs. different values of $s$.
Figure 6.11 Total cost vs. different values of $A_c$.
Figure 7.1 Pictorial representation of the inventory system.
Figure 7.2 Different cases of trade credit period $M$.
Figure 7.3 Case 1: The total cost with respect to $t_r$ and $t_o$.
Figure 7.4 Case 2: The total cost with respect to $t_r$ and $t_o$.
Figure 7.5 Case 3: The total cost with respect to $t_r$ and $t_o$.
Figure 7.6 Case 4: The total cost with respect to $t_r$ and $t_o$.
Figure 7.7 Case 5: The total cost with respect to $t_r$ and $t_o$.
Figure 8.1 Representation of the inventory level by graph.
Figure 8.2 Example 8.1: Total cost with respect to $m$.
Figure 8.3 Example 8.1: Total cost with respect to $m$ when $\mu = 0$.
Figure 8.4 Example 8.2: Total cost with respect to $m$.
Figure 8.5 Example 8.2: Total cost with respect to $m$ when $\mu = 0$.
Figure 8.6 Total cost vs. different values of $H$.
Figure 8.7 Total cost vs. different values of $a$.
Figure 8.8 Total cost vs. different values of $W_t$.
Figure 8.9 Total cost vs. different values of $p$.
Figure 8.10 Total cost vs. different values of $A$.
Figure 8.11 Total cost vs. different values of the parameter $\delta$.
Figure 8.12 Total cost vs. different values of the parameter $R$.
