Chapter I General Introduction-I 1-12
   Fundamentals of corrosion
      Introduction 1
      Mechanism of corrosion 3
      Types of corrosion 5
      Methods of corrosion protection 9

General Introduction-II 13-37
Corrosion inhibitors
      Introduction 13
      Classification of corrosion inhibitors 14
      Adsorption of inhibitor on metal surface 15
      Toxicity of corrosion inhibitors 17
      Environment friendly or green corrosion inhibitors 18
Chapter II  Materials and the experimental procedures

Metal specimen selected for the study  38

Inhibitors selected for the study

Synthesis and characterization of glycine derivative N-benzylidene-2((2-oxo-2-(10H-phenothiazine-10yl)ethyl)amino) acetohydrazide  38

Synthesis and characterization of amino acid ionic liquid surfactants  40

Test solution selected for the study  43

Corrosion inhibition studies  43-46

Gravimetric study  43

Synergistic inhibition effect of surfactant additives  44

Adsorption isotherm  44

Computation of thermodynamic and activation parameters  45

Electrochemical measurements  46
Chapter III  L-Cysteine as corrosion inhibitor for mild steel in 1 M HCl and synergistic effect of anionic, cationic and non-ionic surfactants

Result and discussion 52-61

Gravimetric study 52-56

Effect of Concentration and Temperature 52

Effect of Immersion Time 53

Effect of surfactant additives 53

Adsorption isotherm 55

Thermodynamic and kinetic parameters 55

Electrochemical measurements 56-59

Potentiodynamic polarization study 56

Electrochemical impedance spectroscopy 57

Quantum chemical calculation 59

FT-IR 60

SEM 60

Conclusions 62
Chapter IV  L-Tyrosine as corrosion inhibitor for mild steel in 1 M HCl solution and synergistic effect of surfactant additives

Result and discussion

Gravimetric study

Effect of Concentration and Temperature

Effect of surfactant additives

Adsorption isotherm

Thermodynamic and kinetic parameters

Electrochemical measurements

Potentiodynamic polarization study

Electrochemical impedance spectroscopy

Quantum chemical calculation

UV-Visible spectroscopy

FT-IR

SEM

Conclusions

Chapter V  L-Phenylalanine methyl ester hydrochloride as green corrosion inhibitor for mild steel in hydrochloric
acid solution and effect of surfactant additive

Result and discussion

Gravimetric study

Effect of Concentration and Temperature

Effect of immersion time

Effect of surfactant additive

Adsorption isotherm

Thermodynamic and kinetic parameters

Electrochemical measurements

Potentiodynamic polarization study

Electrochemical impedance spectroscopy

Quantum chemical calculation

UV-Visible spectroscopy

SEM-EDX

Conclusions

Chapter VI

Assessment of glycine derivative N-benzylidene-2((2-oxo-2-(10H-phenothiazine-10yl)ethyl)amino) acetohydrazide as inhibitor for mild steel corrosion in 1 M HCl solution

Result and discussion

Gravimetric study
### Effect of Concentration and Temperature
- 136

### Effect of surfactant additives
- 136

### Adsorption isotherm
- 137

### Thermodynamic and kinetic parameters
- 138-140

### Electrochemical measurements
- 138
  - Potentiodynamic polarization study
- 139
  - Electrochemical impedance spectroscopy
- 140
  - Quantum chemical calculation
  - UV-Visible spectroscopy
  - FT-IR
  - SEM-EDX
- 142

### Conclusions

### Chapter VII Biodegradable Amino Acid Ionic Liquid Surfactants as Mild Steel Corrosion Inhibitor in 1 M HCl Solution

#### Result and discussion
- 159-166

#### Gravimetric study
- 159-161
  - Effect of Concentration and Temperature
- 159
  - Adsorption isotherm
- 160
  - Thermodynamic and kinetic parameters
- 160

#### Electrochemical measurements
- 161-164
- 161
Potentiodynamic polarization study 162
Electrochemical impedance spectroscopy 164
Quantum chemical calculation 165
FT-IR 166
SEM-EDX 167

Conclusions
Chapter-VIII  Conclusions 181
Scope for future work 183
