Acknowledgement

Guru Govind Dono khade kake lagun paaye,  
Balihari guru aapne govind diyo bataye.  
- Sant kabir

This is an old saying by Kabir Das which means that once God said to follower that one’s teacher should be respected more than God himself. In my context too, it is quite true. I cannot express my sincere gratitude merely by words today because sometimes I feel that though language is a tool to communicate, sometimes It becomes so difficult to express one’s feelings in words. Dr. Mukherjee, my teacher, not only taught and introduced me the new field of fermentation technology, but also, more importantly, the principles of life itself. I first met him when I was a novice student six years back and it was he who helped me (like a good friend) to gain confidence in life. I am really grateful to him for being with me when I needed him most.

I express my sincere regards to Indira madam for her encouragement and care. I have also enjoyed a good time with Anandi and Ketaki.

I feel proud of being a part of the CBT family and I am quite lucky to have got the chance to live, learn and do research under the warm shadows of its teachers.

I am thankful and express my sincere gratitude to Prof. Bhatnagar for not just helping me as the Chairman of CBT in administrative matters but also in academic matters. I am also thankful to Prof. S. K. Kar for guidance and useful suggestions in some preliminary experiments. I am also thankful to Prof. K.B. Roy, Dr. Uttam Pati and Dr. Maitra for their useful suggestions and help. I am thankful to Dr. Aparna Dixit for her help in my research.

It is said good friends and people come from heaven. My friends stood beside me to support me whenever I needed them. No words and expression is enough to thanks Palash, Poonam, Yogi, Amar, Suman, Mimin, Sanjay, Sangeeta, and Ramsukh. I should be honest enough to say that without them this thesis would never have reached its current shape.

I would like to thanks my seniors Dr. Ramanuj Lahiri and Sanjeev Goswami for their help in carrying out the preliminary experiments relating to isolation and induction of PBMC.
Dr. Dev Priya chaudhary is a new friend, whose experience and discussions at tea breaks really benefited me.

I would like to thank my senior and friend Dr. Jagdish Gupta, from whom I learned the basic techniques, for his kind help during my research. My sincere thanks to Dr. Atul Thatai and Dr. Shams Yazdani.

My ‘Dhanyabad’ to Bade Mishraji and Chottie Mishraji for their help and efforts. I really benefited from their discussions involving life and politics.

I am thankful to my school friends Vinay and Seema for their kind help. My regards and thanks to Prasanna, Samer and Vikas whom I always disturbed for my tea and had useful discussions about experiments etc.

My special thanks to Praveen, Hiamanshu, Aditya, Sindhu and Suneel.

My sincere thanks to Aruna, Vandana, Ramani, and Mohsin.

I am also thankful to Rajvir, Sujata, Nidhi, Tanuja, Gautam, Bijoy, Azhar, Amzad. Veenu, Sarita and Puneet and my hostel friends Harish, Mukesh, Vineet, Girish and Nandlal. Thanks also to Achal, Anita, Shekhar and Jitesh.

My sincere thanks to respected Naipal ji, Vedpal ji, Yadav ji, Sindu Madam, Vishu ji, Anil ji, Umesh ji, Dilbag ji, Sajan ji and also to Tyagi ji and Aiyer ji who were always ready for help in administrative matters.

I am also thankful to Jawaharlal Nehru University and UGC for providing me fellowship and platform to complete the research for my thesis.

I am grateful to My Papaji, Mummiji, Mridula didi, Ashok jijaji, Pratibha didi, Aditya jijaji, Savita didi, My younger brother Saurabh and other family members for their constant encouragement during this Ph.D. Without their cooperation and sacrifice it would not have been possible for me to finish my thesis.

I also want to thank all the persons who were directly or indirectly associated with me during my stay at JNU.

Thankyou, Aarigatogozymustu, Gracius,

Gaurav
