ACKNOWLEDGEMENT

I take this opportunity to convey my heartfelt thanks to my teacher and guide Professor T.V. Rao, for his constant supervision, support and encouragement through advice and fruitful discussion, which helped me in successful culmination of the present endeavor. I came across a lot of difficulties during the tenure of my work and it was for his continuous guidance, tremendous patience and advice that it was possible to successfully overcome them. I am also thankful to him for his admirable patience and affection at every stage of the project for which I shall remain ever indebted to him.

With immense pleasure, I express my deep sense of gratitude and reverence to my esteemed Co-supervisor Dr Subrat Satapathy, Scientist-C, R.T.R.S.-CSB, Baripada, Odisha for his meticulous guidance, constructive criticism, assiduous help, prudent suggestions, constant encouragement, personal care and moral support throughout the research work.

I express my gratitude to Dr. N. Behera, Head, School of Life Sciences, Sambalpur University, for providing all necessary laboratory facilities to carry out the research work.

I owe my thanks to my teachers Dr. S.P.Mishra, Dr. E. Karali, Dr. A.K. Patel, Dr. (Mrs) S. Sahu, Dr. (Mrs) B. Nayak, and Retd. Prof N. K. Choudhury, Retd. Prof. P. K. Mohapatra, and and Prof (Mrs) B. Biswal of School of Life Sciences for their valuable suggestion and constant support during my research work.

I am thankful to Dr. N.K. Swain, Sri G. S. Dwibedi, Sri P.K.Panigrahi, Megha Dada, Mayadhar Dada of Ecology, Microbiology and Biochemistry laboratories of School of Life Sciences, who whole heartedly co-operated during the course of this research work.

I wish to express my deep sense of reverence to Prof. S.K. Sahu Dept. of Environmental Sciences for his help during the course of my research.
I am also indebted to Mr. Nilachala dash, Demonstrator, Dept. of Zoology, G. M college, Sambalpur for his valuable help and support since the inception of this work.

I am extremely thankful and highly obliged to Mrs. Priti Pragyan Ray, whose valuable scholastic guidance, constant encouragement, made it possible for me to accomplish this research work.

I also express my gratefulness to Mr. Purusottam Dash, Sericulture Extension Officer, Sonepur for his help and inspiration for my work.

I also express my gratefulness to my junior colleagues Gajala Sahin, Subasa and Prasant for their priceless help and wholehearted support during the research work and during the preparation of this manuscript inspiration for my work. I take this opportunity to thank Ramesh for the assistance during the experimental period.

I feel short of words to express my wholehearted devotion and gratitude to my parents for their blessings, unfeigned love, sacrifice and encouragement during my studies. My hearty love and thanks to my brother Samir for helping me in every possible way.

I am indebted to my gratitude towards my parents in law without their continual encouragement and unstinted moral support this work could not have been finished.

I am sincerely thankful to my husband Dr. Malaya Kumar Patel for his help and flexibility during these years of intense work. Without his constant motivation it was just impossible to complete the mission. I don't find words to thank my two year old son Manit to describe his contribution in completion of this thesis.

Last but not the least - I bow my head before Almighty for all his Blessings.

Jyotivihar
