

A C K N O W L E D G E M E N T

It is with profound regards that I wish to put on record my debt of gratitude to my parents as their blessings have been a prime source of inspiration without which it would not have been possible to undertake this work and to become what I am to-day.

Also with profound sense of gratitude and due reverence, I express my deep sense of indebtedness to my supervisor Professor Pradipta Kishore Dash for revealing the direction and providing an exemplary guidance through out the period of my research. Any attempt here to acknowledge his contribution, even to the best of my ability, may, at the most, turn out to be only symbolic and certainly be inadequate. The most appropriate acknowledgement of his contributions would, I believe, be to emulate his example of patience, hardwork and dedication to the cause of learning.

I express my sincere thanks to Prof. Somnath Misra, Principal, Regional Engineering College, Rourkela-8, Orissa, India, for providing the necessary facilities during the period of my research.

I am very much thankful to Prof. Sribatsa Nanda and Prof. Ajoy Kumar Mohanty for their sincere advice and help.

My special thanks are to Sri J.K.Patnaik of Govt. College, Rourkela, for introducing me to my supervisor and for his constant encouragement.

My thanks are to my teachers Dr. T. Mishra and Dr. N. C. Sahu and to Dr. K. C. Patra, Dr. T. Patel, Sri Tarenisen Patel and Sri S. K. Brahma.

A special mention of Sri Khageswar Das, Typist, gives me a great pleasure. This thesis would not have been in its present shape and form without his dedicated and painstaking efforts. I also thank Sri Sahadev Karali for good sketching.

This acknowledgement will be incomplete without a word of appreciation to my wife Srimati Pramoda Panda and sons Sanjay and Sandeep for their forbearance during the period of my research.
