Acknowledgement

I am thankful to my guides Dr N. Sahoo, General Manager(Technical), M/S OCL India Limited and Professor Dr A. Panda, P G Department of Chemistry, Sambalpur University for their guidance and supervision of my research work. Their regular follow-ups and valuable suggestions helped to complete the thesis work successfully.

I express my special thanks to Dr B K Panda, Director, Dalmia Institute of Scientific and Industrial Research and his team of scientists for their help during carrying out experimental work. I express my sincere gratitude to my departmental colleagues for helping me in all possible ways to complete this thesis work.

I am grateful to all my friends and well-wishers for their constant motivation and encouragement.

My family members have provided the necessary inspiration for the research. I am indebted to them for their moral support. The present piece of research work could be undertaken due to inspiration and sacrifice on the part of my wife, Rama.

I thank the management of M/S OCL India Limited for granting me the permission to carry this research work. I am deeply grateful to Syt.M H Dalmia, President & CEO and Syt. R H Dalmia, President for their keen interest in promoting Research and Developmental activities in the organisation. My special thanks are due to Mr V P Sood, Whole Time Director and Mr S K Chaudhuri, Executive Director (Refractory) for providing all infrastructural facilities and constant encouragement during the course of research work.

R Kartik
