Abstract	vii
Table of Contents	ix
List of Tables	xiv
List of Figures	xvi
List of Photographs	xviii
List of Abbreviations	xix
CHAPTER I	
1.0 INTRODUCTION	01 – 23
1.1 Relation to the Post Transfusion Hepatitis by HBV through Blood Transfusion	3
1.2 Early recognition of viral hepatitis	7
1.3 Discovery of Australia antigen	8
1.4 Early Detection of Hepatitis B Virus	9
1.5 History of Hepatitis B Virus	10
1.6 Structure of Australia antigen	12
1.6.1 Dane particle of HBV	13
1.6.2 Discovery of HBV DNA	14
1.6.3 Cloning of HBV DNA	15
1.6.4 Serological diagnosis of HBV infections	16
1.7 Significance of anti-HBs	17
1.8 Significance of anti-HBc	18
1.9 Significance of IgM antibodies to HBcAg	20
1.10 Quantitation of IgM anti-HBc	21
1.11 Statement of the problem	22
1.12 Aims and Objective	22
1.13 Purpose of the Study	22
1.14 Research Hypothesis	23

1.15 Significance of the study	23
CHAPTER II	
2.0 REVIEW OF LITERATURE	24 – 80
2.1 Over view of Hepatitis B virus	24
2.2 Hepatitis B virus Transmitted by Blood Transfusion	25
2.3 Post Blood Transfusion Hepatitis	27
2.3.1 NANB, Post Transfusion Hepatitis and surrogate markers	30
2.3.2 HCV as major etiological agent of NANB Hepatitis	31
2.3.3 Post Transfusion Hepatitis by Hepatitis G virus (HGV) and other Putative agents	33
2.4 Consequence of Post Transfusion Hepatitis	40
2.5 Preventive Measure of Post Transfusion Hepatitis	44
2.5.1 Hepatitis Surface Antigen (HBsAg) Assay	44
2.5.2 Hepatitis core antibody assay (Anti-HBc)	46
2.5.3 Nucleic Acid Test (NAT)	62
2.6 Screening Methods for HBV	64
2.6.1 Fluorescent immunoassays (FIAs)	65
2.6.2 Solid phase immunoassays	66
2.6.3 Antibody capture assays	68
2.6.4 Solid phase antibody tests	69
2.6.5 Solid phase antigen tests	70
2.6.6 Antigen sandwich assay	71
2.6.7 Antiglobulin test	71
2.6.8 Hepatitis Reverse passive haemagglutination assay	72
2.6.9 Competitive immunoassays	74
2.6.10 Combination assays	75
2.6.11 Particle Agglutination Immunoassay	76
2.6.12 Conjugation Chemistry	76
2.7 Importance of HBcore antibody test and nucleic acid Test	78

CHAPTER III

3.0 MATERIALS AND METHODS	81-106
3.1 Study design	81
3.2 Sample	81
3.3 Inclusion criteria	81
3.4 Exclusion criteria	81
3.5 Design	81
3.6 Dependent variable	82
3.7 Non consumable items and consumable items	82
3.7.1 List of Non consumables	82
3.7.2 List of Consumables	83
3.7.3 Materials Required	84
3.8 INSTRUMENTATION: (PHOTOGRAPHS)	85
3.9 SCREENING OF HEPATITIS B SURFACE ANTIGEN (HBSAG) BY CHEMILUMINANCE TECHNIQUE FROM ECI VITROS	88
3.9.1 Test Description	88
3.9.2 Principle of the Assay	89
3.9.3 Materials Required	89
3.9.4 Equipments Required	89
3.9.5 Procedure	89
3.9.6 Result Interpretation:	90
3.10 SCREENING OF HBCAB (TOTAL) BY CHEMILUMINANCE TECHNIQUE FROM ECI VITROS	90
3.10.1 Test Description	90
3.10.2 Principle	90
3.10.3 Materials Required	91
3.10.4 Equipments Required	91
3.10.5 Procedure	91
3.10.6 Result Interpretation	91
3.11 NUCLEIC ACID TESTING OF BLOOD FOR HBV	92
3.11.1 Test Description	92
3.11.2 Principle of the Technology	93

3.11.3 Materials Required	93
3.11.4 Extraction of DNA	93
3.11.5 Target amplification	93
3.11.6 HPA (Hybridization Protection Assay)	94
3.11.7 Materials Required	94
3.11.8 Procedure of Pipetting	97
3.11.9 Amplification	99
3.12. HBV GENOTYPING BY RESTRICTION FRAGMENT LENGTH POLYMORPHISM (RFLP)	100
3.12.1 Materials	100
3.12.2 Methods	101
3.12.3 PCR	102
3.12.4 Agarose Gel Electrophoresis	103
3.12.5 DNA Sequencing and Phylogenetic Analysis	102
3.12.6 Sequencing of the amplified products	104
3.12.7 Result Analysis of HBV Genotype	104
3.13 Descriptive investigation measurements	105
3.13.1 Blood groups and Rh typing by Microtiter test to determine the amount of anti-sheep red blood cell (RBC) antibody.	105
3.14 Data Analysis	106
CHAPTER IV	
4.0. RESULTS AND DISCUSSION	107- 163
4.1 Descriptive analysis of different variants like Age, Gender, Height, Weight, BP, HB, ABO, Rh.	107
4.1.1 Frequency distribution of Age of Sample respondents	107
4.1.2 Gender distribution within samples	109
4.1.3 Distribution of Blood Group (ABO) within samples	110
4.1.4 Distribution of Rh Typing within samples	111
4.2 Descriptive Analysis of Different Variants for HBsAg, HBcAb and ID- NAT in a Blood Donor heterogeneous population	112
4.2.1 Frequency distribution of HBsAg	112
4.2.2 Frequency distribution of HBcAb	113
4.2.3 Frequency distribution of ID-NAT	114

4.2.4 Frequency distribution of HBV Genotyping	115
4.3 Analytical Analysis of different variables.	117
4.3.1 Agreement and sensitivity analysis of HBcAb with respect to HBsAg	117
4.4 Agreement and sensitivity analysis of ID-NAT with respect to HBsAg	119
4.5 Agreement and sensitivity analysis of ID-NAT and HBcAb with respect to HBsAg	121
4.6 Statistical analysis of all the parameters with respect to HBsAg	124
4.7 Statistical analysis of all the parameters with respect to HBcAb	132
4.8 Statistical analysis of all the parameters with respect to ID-NAT	140
4.9 Discussion	148
4.9.1 Scope of the present study	148
4.9.2. Essential of the present study	149
4.9.3 Age of the Blood Donors	152
4.9.4 Gender of the Blood Donors	153
4.9.5 Height and Weight of the Blood Donors	154
4.9.6 Heart rate and Blood pressure of the Blood Donors	155
4.9.7 Hemoglobin of the Blood Donors	157
4.9.8 Relativity of the Hepatitis B core antibody (HBcAb) with Hepatitis surface antigen (HBsAg)	158
4.9.9 Relativity of Individual Donor – Nucleic Acid Test (ID-NAT) with Hepatitis Surface Antigen (HBsAg)	162
4.9.10 Relativity of Hepatitis core antibody (HBcAb) and Individual Donor – Nucleic Acid Test (ID-NAT) with Hepatitis Surface Antigen (HBsAg)	163
CHAPTER V	
5.0 SUMMARY AND CONCLUSION	165- 166
REFERENCES	167- 178
ANNEXURES
