

LIST OF FIGURES

1.1 HBV associated particles under Electron microscopy.	13
1.2 Model of the hepatitis B virus (Dane particle) and the filamentous or spherical HBsAg particles.	14
1.3 Biochemical structure of HBV DNA	17
1.4 Structural components of HBV (left) and open reading frames (ORF) for encoding proteins in the covalently closed form of HBV DNA	18
1.5 Schematic representation of the course of acute HBV infections with resolution.	19
4.1.1 Distribution of Age within Sample respondents	108
4.1.2 Gender Distributions within samples	109
4.1.3 Distribution of Blood Group (ABO) within samples	110
4.1.4 Distribution of Rh Typing within samples	111
4.2.1 Frequency distribution of HBsAg	112
4.2.2 Frequency distribution of HBcAb	113
4.2.3 Frequency distribution of ID-NAT	114
4.2.4 Frequency distribution of HBV Genotypes	116
4.2.5. Distribution of HBV Genotype Band	116
4.6.1 Comparison of age with respect to HBsAg	128
4.6.2 Comparison of height with respect to HBsAg	128
4.6.3 Comparison of weight with respect to HBsAg	129
4.6.4 Comparison of Blood Pressure Diastolic with respect to HBsAg	129
4.6.5 Comparison of Blood Pressure Systolic with respect to HBsAg	130
4.6.6 Comparison of Pulse with respect to HBsAg	130
4.6.7 Comparison of Hemoglobin with respect to HBsAg	131
4.7.1 Comparison of age with respect to HBcAb	136
4.7.2 Comparison of height with respect to HBcAb	136
4.7.3 Comparison of weight with respect to HBcAb	137
4.7.4 Comparison of Blood Pressure (Diastolic) with respect to HBcAb	137
4.7.5 Comparison of Blood Pressure (Systolic) with respect to HBcAb	138
4.7.6 Comparison of Pulse with respect to HBcAb	138
4.7.7 Comparison of Hemoglobin with respect to HBcAb	139
4.8.1 Comparison of age with respect to ID-NAT	144

4.8.2 Comparison of Height with respect to ID-NAT	144
4.8.3 Comparison of Weight with respect to ID-NAT	145
4.8.4 Comparison of Blood Pressure Diastolic with respect to ID-NAT	145
4.8.5 Comparison of Blood Pressure Systolic with respect to ID-NAT	146
4.8.6 Comparison of Pulse with respect to ID-NAT	146
4.8.7 Comparison of Hemoglobin with respect to ID-NAT	147

LIST OF PHOTOGRAPHS

3.8.1 Blood collection monitor	85
3.8.2 Reagent Refrigerator	85
3.8.3 Sample loading in sample well	85
3.8.4 Refrigerator centrifuge machine	85
3.8.5 ECi Fully Automated Immunoassay Analyser	85
3.8.6 Sample monitor window	85
3.8.7 DNA analyzer	86
3.8.8 Sample load area in NAT Lab	86
3.8.9 DNA Transcriptase area	86
3.8.10 Sample Incubation area	86
3.8.11 Dry bath Incubator for DNA Extraction	86
3.8.12 Defreezer -80 ⁰ C	86
3.8.13 Blood Group Centrifuge	87
3.8.14 Automated Blood Group System	87
3.8.15 Sample processing for Blood Group	87
3.8.16 Centrifuge Machine	87
3.8.17 TTUs & samples bar coding	87
3.8.18 The ProcleixUltrio Kit	87
3.8.19 Luminometer	88
3.8.20 Weighing Scale	88
3.8.21 Digital Blood Pressure Monitor	88
3.8.22 Blood Collection from Donor	88

LIST OF TABLES

3.1 Reagent Calculation Chart / Preparation of reagent aliquots Reagent aliquots	95
3.2 Calibrator Positioning Chart	96
3.3 Nucleotide position numbering of Surface Gene Primers	101
4.1 Descriptive analysis of different variants like Age, Gender, Height, Weight, BP, pulse and Hb.	107
4.1.2 Gender Distributions within samples	109
4.1.3 Distribution of Blood Group (ABO) within samples	110
4.1.4 Distribution of Rh Typing within samples	111
4.2.1 Frequency distribution of HBsAg	112
4.2.2 Frequency distribution of HBcAb	113
4.2.3 Frequency distribution of ID-NAT	114
4.2.4 Frequency distribution of HBV Genotyping	115
4.3.1 Agreement and sensitivity analysis of HBcAb with respect to HBsAg	117
4.3.2 Symmetric Measures of HBcAb with HBsAg	117
4.3.3 Risk Estimate HBcAb with HBsAg	118
4.3.4 Diagnostic or Screening Test Evaluation of HBcAb with HBsAg	118
4.4.1 Agreement and sensitivity analysis of ID-NAT with respect to HBsAg	119
4.4.2 Symmetric Measures of ID-NAT with respect to HBsAg	120
4.4.3 Risk Estimation of ID-NAT with respect to HBsAg	120
4.5.1 Agreement and sensitivity analysis of ID-NAT and HBcAb with Respect to HBsAg	122
4.5.2 Symmetric Measures of ID-NAT and HBcAb with respect to HBsAg	122
4.5.3 Risk Estimation of ID-NAT and HBcAb with respect to HBsAg	123
4.5.4 Diagnostic or Screening Test Evaluation of ID-NAT and HBcAb With HBsAg	123
4.6.1 Comparison of all the parameters with respect to HBsAg	124
4.6.2 Independent Samples test of all the parameters with respect to HBsAg	125
4.6.3 T-test for equality of means of all the parameters with respect to HBsAg	126

4.6.4 95 % Confidence interval of the Difference of all the parameters with respect to HBsAg	127
4.7.1 T-test Statistical analysis of all the parameters with respect to HBcAb	132
4.7.2 Levene's Test for Equality of Variances and t-test for Equality of Means analysis of all the parameters with respect to HBcAb	133
4.7.3 Difference between groups and within groups Analysis of all the parameters with respect to HBcAb	135
4.8.1 Group Statistical analysis of all the parameters with respect to ID-NAT	140
4.8.2 Levene's Test for Equality of Variances and t-test for Equality of Means analysis of all the parameters with respect to ID-NAT	141
4.8.3 Independent Samples Test (t-test for Equality of Means) analysis of all the parameters with respect to ID-NAT	142
4.8.4 T-test for Equality of Means of 95% Confidence Interval of the Difference of all the parameters with respect to ID-NAT	143
