ABBREVIATIONS

INTRODUCTION

Sickle Cell Disease
Aim and Objective

REVIEW OF LITERATURE

Historical Review of Sickle Cell Disease
Recognition of Clinical Features in Sickle Cell Disease
Origin of Sickle Cell Disease
Geographical Distribution of Sickle Cell Disease
Nomenclature
Pathophysiology of Sickle Cell Disease
Clinical Features of Sickle Cell Disease
Clinical Heterogeneity of Sickle Cell Disease
Genetic Factors Affecting Clinical Variability of Sickle Cell Disease
Alpha Thalassemia
  Classification
  Geographical Distribution of Alpha Thalassemia
  Interaction between Alpha Thalassemia and HbS
  Effect of Alpha Thalassemia on Homozygous Sickle Cell Disease
Beta Thalassemia
  Classification
  Origin and Spread of Beta Thalassemia
Sickle Beta Thalassemia
  Genetic aspect of Sβ-Thalassemia
  Prevalence of Sβ-Thalassemia
  Hematological Findings in Sβ-Thalassemia
  Clinical Features of Sβ-Thalassemia
  Comparison in Sβ-Thalassemia and Homozygous SCD
Interactions between Sβ- Thalassemia and α-Thalassemia
Environmental Factors Affecting Severity of Sickle Cell Disease

MATERIAL AND METHODS

Place of Study
Study Population
Patient Selection
Clinical Diagnostic Criteria
Methods used for Laboratory Evaluation
  Sickling Slide Test
  Hemoglobin Electrophoresis
  Hematological Investigations
  Biochemical Analysis
Genomic DNA Isolation from the Whole Blood
DNA Purity Check and Quantification
Molecular Analysis
  Detection of Sickle Mutation
  Beta Globin cluster Haplotype by RFLP
  ARMS-PCR for Study of Beta Thalassemia Mutation
  Multiplex PCR for Study of Alpha Thalassemia
Statistical Analysis

RESULTS

Chapter-I
A. Diagnosis and Classification of Sickle Beta Thalassemia in Western Orissa Population
B. Study of Epidemiology, Clinical Features, Hematological Findings and Molecular Characterization of Sβ+ Thalassemia type-I and Sβ− Thalassemia type-II
C. Comparison of Clinical Features and Hematological Findings of Sβ+Thalassemia type-I, type-II and Homozygous Sickle Cell Disease

Chapter-II
A. Diagnosis and Epidemiology of α-Thalassemia in Homozygous SCD of Western Orissa Population
B. Comparison of Clinical Features and Hematological Indices among SCD with and without α-Thalassemia
DISCUSSION

- Sβ-Thalassemia in Western Orissa
- Epidemiology
- Comparison between Sβ⁺ Thalassemia type-I and type-II
- Molecular Characterization of Sβ⁺ Thalassemia
- α-Thalassemia in Sβ⁺ Thalassemia
- Comparison between Sβ⁺ Thalassemia type I, Sβ⁺ Thalassemia type II and SCD
- α-Thalassemia in Homozygous SCD
- Epidemiology
- Influence of α-Thalassemia in Phenotypic Expression of Homozygous SCD
