I would like to thank my family for their understanding, support and encouragement throughout the course of my Ph. D. work, without which it would have been impossible for me to carry on.

I would like to take this opportunity to express my profound gratitude to Bala (Prof. Balachandran Sathiapalan) for his patience, advice, and constant encouragement during the course of this work, and for being a good friend. I am also indebted to him for his excellent supervision during this work, for introducing me some of the most interesting aspects of superstring theory.

My sincere thanks to H. Takata for his advice and encouragement, and for collaboration and for stimulating discussions during my work.

I am thankful to Prof. D. Basu and Shajesh for discussions and collaboration in the course of my work. I would like to thank to Topo, Swarne and Tarun for their co-operation and providing different helpful suggestions during my work.

I cannot thank my hostel-friends enough. They have made my stay happy, comfortable and cozy. I will surely miss them when I will be away from MatSc. Thanks to Neil, Bonnie, Sasikant, Kasturi, Dabboo for providing me the much needed non-academic breaks.

I would like to thank all the academic and non-academic members of IMSc without whose help and support this work could not have been done. Finally, I would like to thank MatSc, for providing me a congenial working atmosphere and financial support to manage my livings during the whole period of my Ph. D. work.
