LIST OF TABLES

TAB. 1-1. SEQUENCE OF SOME MAJOR DISCOVERIES OF PESTICIDES.
1-2. AGRICULTURAL PRODUCTION AND PESTICIDE USAGE IN INDIA DURING 1960-1990.
1-3. DEMAND PATTERN OF PESTICIDES DURING SEVENTH FIVE YEAR PLAN (TONNES) AND THEIR SHARE AS COMPARED TO WORLD MARKET.
1-4. MAJOR CLASSES OF PESTICIDES, THEIR REPRESENTATIVE PRODUCT AND AMOUNTS PRODUCED IN INDIA.
1-5. SOME COMMON ORGANOPHOSPHATES.
1-6. SUMMARY OF KNOWN TOXIC EFFECTS ON EARTHWORM OF SOME COMMONLY USED INSECTICIDES.
1-7. EFFECT OF INSECTICIDES ON THE SURVIVAL AND REPRODUCTION OF EISENIA EARTHWORMS.
1-8. TOXICITY OF FOUR LUMBRICID SPECIES TO BIocide SOLUTIONS.

3-1. DETAILS OF THE INSECTICIDES USED.
3-2. VEGETATION OF THE STUDY SITE.
3-3. CLIMATOLOGICAL DATA OF THE STUDY SITE.
3-4. IMPORTANT INSECT PESTS, DISEASES OF PADDY PLANTS AND THEIR CONTROL.

4-1. MONTHWISE VARIATION IN AIR TEMPERATURE, SOIL SURFACE TEMPERATURE, SOIL SURFACE MOISTURE AND SOIL MOISTURE AT 15 cm DEPTH IN CONTROL PLOT.
VI

TAB. 4-2. MONTHWISE VARIATION IN AIR TEMPERATURE, SOIL SURFACE TEMPERATURE, SOIL SURFACE MOISTURE AND SOIL MOISTURE AT 15 cm DEPTH IN PHORATE TREATED PLOT.

4-3. MONTHWISE VARIATION IN AIR TEMPERATURE, SOIL SURFACE TEMPERATURE, SOIL SURFACE MOISTURE AND SOIL MOISTURE AT 15 cm DEPTH IN FENITROTHION TREATED PLOT.

4-4. MONTHWISE VARIATION IN AIR TEMPERATURE, SOIL SURFACE TEMPERATURE, SOIL SURFACE MOISTURE AND SOIL MOISTURE AT 15 cm DEPTH IN MALATHION TREATED PLOT.

4-5. SEASONAL VARIATION IN AIR-TEMPERATURE, SOIL TEMPERATURE, AND SOIL MOISTURE IN CONTROL AND TREATED PLOTS.

4-6. PHYSICO-CHEMICAL CHARACTERISTICS OF THE SOIL OF THE STUDY SITE.

4-7. SEASONAL CHANGES IN C:N RATIO IN CONTROL AND TREATED PLOTS.

4-8. MALATHION VARIATION IN CO₂ EVOLUTION FROM SOIL IN CONTROL AND TREATED PLOTS.

4-9. SEASONAL CHANGES IN SOIL AMYLASE ACTIVITY IN CONTROL AND TREATED PLOTS.

4-10. SEASONAL CHANGES IN SOIL INVERTASE ACTIVITY IN CONTROL AND TREATED PLOTS.
4-11. SEASONAL CHANGES IN SOIL CELLULASE ACTIVITY IN CONTROL AND TREATED PLOTS.

4-12. SEASONAL CHANGES IN SOIL DEHYDROGENASE ACTIVITY IN CONTROL AND TREATED PLOTS.

4-13. STATISTICAL TABLE SHOWING VALUES FOR CORRELATION COEFFICIENT ($r$), SLOPE ($b$) AND INTERCEPT BETWEEN SOIL PARAMETERS, THEIR METABOLISM AND EARTHWORM POPULATION IN CONTROL PLOT.

4-14. STATISTICAL TABLE SHOWING VALUES FOR CORRELATION COEFFICIENT ($r$), SLOPE ($b$) AND INTERCEPT BETWEEN SOIL PARAMETERS, THEIR METABOLISM AND EARTHWORM POPULATION IN PHORATE TREATED PLOT.

4-15. STATISTICAL TABLE SHOWING VALUES FOR CORRELATION COEFFICIENT ($r$), SLOPE ($b$) AND INTERCEPT BETWEEN SOIL PARAMETERS, THEIR METABOLISM AND EARTHWORM POPULATION IN FENITROTHION TREATED PLOT.

4-16. STATISTICAL TABLE SHOWING VALUES FOR CORRELATION COEFFICIENT ($r$), SLOPE ($b$) AND INTERCEPT BETWEEN SOIL PARAMETERS, THEIR METABOLISM AND EARTHWORM POPULATION IN MALATHION TREATED PLOT.

4-17. PERCENTAGE OF SPECIES COMPOSITION IN EXPERIMENTAL PLOTS.

4-18. MONTHWISE VARIATION IN TOTAL EARTHWORM POPULATION DENSITY (NO/m²) IN CONTROL AND TREATED PLOTS.
4-19. SPECIES AND SIZE-CLASS WISE DISTRIBUTION OF EARTHWORM DENSITY (NO/m²) IN CONTROL PLOT.

4-20. SPECIES AND SIZE-CLASS WISE DISTRIBUTION OF EARTHWORM DENSITY (NO/m²) IN PHORATE TREATED PLOT.

4-21. SPECIES AND SIZE-CLASS WISE DISTRIBUTION OF EARTHWORM DENSITY (NO/m²) IN FENITROTHION TREATED PLOT.

4-22. SPECIES AND SIZE-CLASS WISE DISTRIBUTION OF EARTHWORM DENSITY (NO/m²) IN MALATHION TREATED PLOT.

4-23. SEASONAL FLUCTUATION IN THE TOTAL ADULT WORM DENSITY IN CONTROL AND TREATED PLOTS.

4-24. SEASONAL FLUCTUATION IN THE TOTAL IMMATURE WORM DENSITY IN CONTROL AND TREATED PLOTS.

4-25. SEASONAL FLUCTUATION IN THE TOTAL JUVENILE WORM DENSITY IN CONTROL AND TREATED PLOTS.

4-26. MONTHWISE VARIATION IN THE TOTAL EARTHWORM BIOMASS (g/m²) IN CONTROL AND TREATED PLOTS.

4-27. SPECIES AND SIZE-CLASS WISE DISTRIBUTION OF EARTHWORM BIOMASS (g/m²) IN CONTROL PLOT.

4-28. SPECIES AND SIZE-CLASS WISE DISTRIBUTION OF EARTHWORM BIOMASS (g/m²) IN PHORATE TREATED PLOT.
4-29. SPECIES AND SIZE-CLASS WISE DISTRIBUTION OF EARTHWORM BIOMASS (g/m²) IN FENITROTHION TREATED PLOT.

4-30. SPECIES AND SIZE-CLASS WISE DISTRIBUTION OF EARTHWORM BIOMASS (g/m²) IN MALATHION TREATED PLOT.

4-31. SEASONAL FLUCTUATION IN THE TOTAL JUVENILE WORM BIOMASS IN CONTROL AND TREATED PLOTS.

4-32. SEASONAL FLUCTUATION IN THE TOTAL IMMATURE WORM BIOMASS IN CONTROL AND TREATED PLOTS.

4-33. SEASONAL FLUCTUATION IN THE TOTAL ADULT WORM BIOMASS IN CONTROL AND TREATED PLOTS.

4-34. MONTHWISE DISTRIBUTION OF TOTAL NUMBER OF EARTHWORM COCOONS (NO/m²) IN CONTROL AND TREATED PLOTS.

4-35 SPECIES WISE DISTRIBUTION OF EARTHWORM COCOON BIOMASS IN CONTROL AND TREATED PLOTS.

4-36. TOXICITY OF MONOCROTOPHOS ON DRAWIDA CALEBI.

4-37. TOXICITY OF MONOCROTOPHOS ON LAMPITO MAURITII.

4-38. TOXICITY OF MONOCROTOPHOS ON DRAWIDA WILLSI.

4-39. TOXICITY OF MONOCROTOPHOS ON OCTOCHAETONA SURENSIS.

4-40. TOXICITY OF FENITROTHION ON LAMPITO MAURITII.

4-41. TOXICITY OF FENITROTHION ON DRAWIDA CALEBI.

4-42. TOXICITY OF FENITROTHION ON DRAWIDA WILLSI.

4-43. TOXICITY OF FENITROTHION ON OCTOCHAETONA SURENSIS.
Tab. 4-44. Toxicity of malathion on Lampito Mauritii.
4-45. Toxicity of malathion on Drawida calebi.
4-46. Toxicity of malathion on Drawida Willisii.
4-47. Toxicity of malathion on Octochaetona Suresnis.
4-48. Urea and ammonia excretion by fenitrothion treated Drawida calebi worm.
4-49. Urea and ammonia excretion by monocrotophos treated Drawida calebi worm.
4-50. Urea and ammonia excretion by fenitrothion treated Lampito Mauritii worm.
4-51. Urea and ammonia excretion by monocrotophos treated Lampito Mauritii worm.
4-52. Sublethal toxicity effect of fenitrothion and malathion on gut enzymatic activities in Lampito Mauritii.
4-53. Sublethal toxicity effect of fenitrothion and malathion on gut enzymatic activities in Octochaetona Suresnis.
4-54. Sublethal toxicity effect of fenitrothion and malathion on gut enzymatic activities in Drawida Willisii.
4-55. ChE activity in nerve and muscle tissue of D. calebi and L. Mauritii on one hour exposure to monocrotophos.
TAB. 4-56. ChE ACTIVITY IN NERVE AND MUSCLE TISSUE OF D. CALEBI AND L. MAURITII ON CONTINUOUS EXPOSURE TO MONOCROTOPHOS.

4-57. ChE ACTIVITY IN NERVE AND MUSCLE TISSUE OF D. CALEBI AND L. MAURITII ON ONE HOUR EXPOSURE TO FENITROTHION.

4-58. ChE ACTIVITY IN NERVE AND MUSCLE TISSUE OF D. CALEBI AND L. MAURITII ON CONTINUOUS EXPOSURE TO FENITROTHION.

4-59. VARIATION IN SOIL AMYLASE ACTIVITY IN LABORATORY POT EXPERIMENT.

4-60. VARIATION IN SOIL INVERTASE ACTIVITY IN LABORATORY POT EXPERIMENT.

4-61. VARIATION IN SOIL CELLULASE ACTIVITY IN LABORATORY POT EXPERIMENT.

4-62. VARIATION IN SOIL DEHYDROGENASE ACTIVITY IN LABORATORY POT EXPERIMENT.

4-63. VARIATION IN THE ACTIVITY OF SOIL RESPIRATION IN LABORATORY POT EXPERIMENT.

4-64. FORTNIGHTLY CHANGES IN AVERAGE BODY WEIGHT OF DRAWIDA CALEBI.

4-65. FORTNIGHTLY CHANGES IN AVERAGE BODY WEIGHT OF OCTOCHAETONA SURENSIS.

4-66. FORTNIGHTLY CHANGES IN AVERAGE BODY WEIGHT OF LAMPITO MAURITII.
TAB. 4-67. FORTNIGHTLY CHANGES IN AVERAGE BODY WEIGHT OF
DRAWIDA WILLSI.

4-68. FORTNIGHTLY COCOON PRODUCTION PER EACH FIVE
PAIRS OF EARTHWORM SPECIES IN CONTROL AND
TREATED POTS.

5-1. DENSITY, BIOMASS AND ANNUAL PRODUCTION PER \( m^2 \)
OF EARTHWORM IN VARIOUS WORLD SITES.

5-2. TOXICITY OF ORGANOPHOSPHORUS COMPOUNDS TO EARTH-
WORMS.

5-3. GUT ENZYMES OF OLIGOCHAETES.

5-4. REFERENCES CONCERNING THE INFLUENCE OF PESTICIDES
ON SOIL ENZYMES.

NOTE: THE WORD FORTNIGHT Typed in THIS Thesis MEANS 15 DAYS.
LIST OF FIGURES:

FIG. 1-1. POINTS IN CARBOHYDRATE OXIDATION AT WHICH INSECTICIDES INHIBIT ATP SYNTHESIS (BROWN, 1978).

1-2. POINTS IN THE INSECT NERVOUS SYSTEM AT WHICH INSECTICIDES DERANGE OR INHIBIT ACTION POTENTIAL TRANSMISSION (BROWN, 1978).

1-3. POINTS IN PHOTOSYNTHESIS AT WHICH HILL-REACTION INHIBITING HERBICIDES INHIBIT ATP AND NADH PRODUCTION.

1-4. COMPLEXITY OF ENVIRONMENTAL PROBLEMS POSED BY PEST CONTROL CHEMICALS.

1-5. FATE OF XENOBIOTIC COMPOUNDS.

1-6. FATE OF AGROCHEMICALS IN SOIL.

1-7. DIVERSIFIED ROLE OF EARTHWORMS.

1-8. THE CONCENTRATION OF INSECTICIDE RESIDUES IN SOIL EARTHWORM AND SLUGS.

4-1. SEASONAL CHANGES IN THE CLIMATOLOGICAL DATA OF THE CONTROL PLOT.

4-2. SEASONAL CHANGES IN THE CLIMATOLOGICAL DATA OF THE PHORATE TREATED PLOT.

4-3. SEASONAL CHANGES IN THE CLIMATOLOGICAL DATA OF THE SUMITHION (FENITROTHION) TREATED PLOT.

4-4. SEASONAL CHANGES IN THE CLIMATOLOGICAL DATA OF THE MALATHION TREATED PLOT.
FIG. 4-5. SEASONAL VARIATION IN SOIL pH CONTENT IN CONTROL AND TREATED PLOTS.

4-6. SEASONAL VARIATION IN SOIL ORGANIC CARBON CONTENT (%) IN CONTROL AND TREATED PLOTS.

4-7. SEASONAL VARIATION IN SOIL NITROGEN CONTENT (%) IN CONTROL AND TREATED PLOTS.

4-8. VARIATION IN CARBON DIOXIDE EVOLUTION IN SOIL IN CONTROL AND TREATED PLOTS.

4-9. SEASONAL VARIATION IN SOIL AMYLASE ACTIVITY IN CONTROL AND TREATED PLOTS.

4-10. SEASONAL VARIATION IN SOIL INVERTASE ACTIVITY IN CONTROL AND TREATED PLOTS.

4-11. SEASONAL VARIATION IN SOIL CELLULASE ACTIVITY IN CONTROL AND TREATED PLOTS.

4-12. SEASONAL VARIATION IN SOIL DEHYDROGENASE ACTIVITY IN CONTROL AND TREATED PLOTS.

4-13. VARIATION IN TOTAL WORM POPULATION DENSITY IN CONTROL AND TREATED PLOTS.

4-14 SEASONAL FLUCTUATION IN TOTAL JUVENILE WORM DENSITY IN CONTROL AND TREATED PLOTS.

4-15. SEASONAL FLUCTUATION IN TOTAL IMMATURE WORM DENSITY IN CONTROL AND TREATED PLOTS.

4-16. SEASONAL FLUCTUATION IN TOTAL ADULT WORM DENSITY IN CONTROL AND TREATED PLOTS.

4-17. SEASONAL FLUCTUATION IN TOTAL WORM BIOMASS IN CONTROL AND TREATED PLOTS.
FIG. 4-18. SEASONAL FLUCTUATION IN TOTAL JUVENILE WORM BIOMASS IN CONTROL AND TREATED PLOTS.

4-19. SEASONAL FLUCTUATION IN TOTAL IMMATURE WORM BIOMASS IN CONTROL AND TREATED PLOTS.

4-20. SEASONAL FLUCTUATION IN TOTAL ADULT WORM BIOMASS IN CONTROL AND TREATED PLOTS.

4-21. DISTRIBUTION OF EARTHWORMS COCOONS IN CONTROL AND TREATED PLOTS.

4-22. DISTRIBUTION OF EARTHWORMS COCOON BIOMASS IN CONTROL AND TREATED PLOT.

4-23. FENITROTHION TOXICITY TO EARTHWORMS.

4-24. MONOCROTOPHOS TOXICITY TO EARTHWORMS.

4-25. MALATHION TOXICITY TO EARTHWORMS.

4-26. PERCENTAGE CHANGE IN UREA EXCRETION DUE TO MONOCROTOPHOS TOXICITY. (A = Lampito mauritii, B = Drawida calebi)

4-27. PERCENTAGE CHANGE IN UREA EXCRETION BY Lampito mauritii WORM DUE TO FENITROTHION TOXICITY.

4-28. PERCENTAGE CHANGE IN UREA EXCRETION BY Drawida calebi WORM DUE TO FENITROTHION TOXICITY.

4-29. PERCENTAGE CHANGE IN NH₃ EXCRETION BY Drawida calebi WORM DUE TO FENITROTHION TOXICITY.

4-30. PERCENTAGE CHANGE IN NH₃ EXCRETION BY Lampito mauritii WORM DUE TO FENITROTHION TOXICITY.
FIG. 4-31. PERCENTAGE CHANGE IN NH$_3$ EXCRETION BY DRAWIDA CALEBI WORM DUE TO MONOCROTOPHOS TOXICITY.

4-32. PERCENTAGE CHANGE IN NH$_3$ EXCRETION BY LAMPITO MAURITII WORM DUE TO MONOCROTOPHOS TOXICITY.

4-33. EFFECT OF FENITROTHION ON GUT ENZYMATIC ACTIVITIES OF LAMPITO MAURITII, OCTOCHAETONA SURENSIS AND DRAWIDA WILLSI.

4-34. EFFECT OF MALATHION ON GUT ENZYMATIC ACTIVITIES OF LAMPITO MAURITII, OCTOCHAETONA SURENSIS AND DRAWIDA WILLSI.

4-35. EFFECT OF FENITROTHION, MALATHION AND MONOCROTOPHOS ON SOIL CARBON DIOXIDE EVOLUTION ACTIVITY IN LABORATORY POT EXPERIMENTS.

4-36. EFFECT OF FENITROTHION, MALATHION AND MONOCROTOPHOS ON SOIL AMYLASE ACTIVITY IN LABORATORY POT EXPERIMENTS.

4-37. EFFECT OF FENITROTHION, MALATHION AND MONOCROTOPHOS ON SOIL INVERTASE ACTIVITY IN LABORATORY POT EXPERIMENTS.

4-38. EFFECT OF FENITROTHION, MALATHION AND MONOCROTOPHOS ON SOIL CELLULASE ACTIVITY IN LABORATORY POT EXPERIMENTS.

4-39. EFFECT OF FENITROTHION, MALATHION AND MONOCROTOPHOS ON SOIL DEHYDROGENASE ACTIVITY IN LABORATORY POT EXPERIMENTS.
FIG. 4-40. HISTOGRAM SHOWING GROWTH OF DRAWIDA CALEBI WORM AT 28±3°C IN LABORATORY POT CULTURE MEDIUM.

4-41. HISTOGRAM SHOWING GROWTH OF OCTOCHAETONA SURENSIS WORM AT 28±3°C IN LABORATORY POT CULTURE MEDIUM.

4-42. HISTOGRAM SHOWING GROWTH OF LAMPITO MAURITII WORM AT 28±3°C IN LABORATORY POT CULTURE MEDIUM.

4-43. HISTOGRAM SHOWING GROWTH OF DRAWIDA WILLSI WORM AT 28±3°C IN LABORATORY POT CULTURE MEDIUM.

4-44. TOTAL NUMBER OF COCOONS PRODUCED PER FIVE PAIRS OF EACH EARTHWORM SPECIES DURING THE PERIOD OF LABORATORY INVESTIGATION.
