ACKNOWLEDGEMENT

The author gratefully acknowledges the valuable guidance and the constant encouragement given by Dr. R. N. Das, Professor, Department of Civil Engineering, University College of Engineering, Burla, under whose supervision the present investigation has been carried out.

The author is highly grateful to Dr. B. B. Banerjee, ex-Head of the Department of Physics, University College of Engineering, Burla, for his valuable guidance.

The author is also grateful to Dr. Kampal Mishra, Reader in Physics, Jyotivihar, Sambalpur University and Sri G. S. Rath, Reader in Electronics, University College of Engineering, Burla for their help in conducting the experiment.

The author is grateful to Prof. S. K. Basu, Principal (ex-Head of the Department of Electrical Engineering) for his kind permission to carry on the experiment in Electrical Laboratory and Dr. S. Prusty, Prof. and Head of Department of Electrical Engineering and the staff of the Department of Electrical Engineering who have helped in conducting the experiment.

The author is grateful to Prof. B. Mahapatra, ex-Principal, and Dr. V. V. Jayaraman, Professor & Head of the Department of Civil Engineering and the staff of the department of Civil Engineering, University College of Engineering, Burla for the opportunity they have extended to carry out this research.

Lastly the author is very much thankful to Sri K. C. Rout for neatly typing out the thesis.

(M.C. Sahoo)
