ACKNOWLEDGEMENTS

The completion of this doctoral work has been possible with the help and cooperation of a number of people. The much awaited moment has finally reached when any researcher feels elated to express his gratitude to all those who have contributed for the completion of this work.

The first name that comes to my mind is that of Prof. P.K. Tripathy, Professor in Economics, P.G. Department of Economics, Sambalpur University, Orissa, my Doctoral Guide with whom I have several hours of useful and rewarding discussions. The greatest debt is owed to him. He offered invaluable insights and suggestions in preparation of my thesis as and when I approached him. Without his encouragement guidance and constant criticisms, I am afraid; I may not be able to complete my research work. He is the person who motivated throughout the study.

I am highly obliged to Prof. S.S. Rath for his inspiration and efficient guidance whenever I beg his help. At the same time I must record my gratefulness to Prof. K. Sarap Head, Department of Economics, Sambalpur University, Dr. (Mrs). S. Das and Sri. B. Misra for their enthusiastic support.
I am also greatly indebted to my parents for their encouragement and blessing to make the research work complete.

I can not forget to salute my beloved teacher Late Sri Srinivasa Dhaal, Reader in Political Science, Ispat College, Rourkela who died of cancer had helped me immensely particularly during the survey work of this study.

I am also grateful to Sr., Manager, Managers Finance of Rourkela Steel Plant for their valuable discussions and suggestions during the field work of the study.

I owe my gratitude to the office bearers of the Trade Unions for their cooperation during the time of data collection.

I am also thankful to Librarians and Documentation Officers of various institutions which I visited to collect relevant materials for this research work.

I can not forget to acknowledge the cooperation of the people in the rank of employers and the workforce connected with the Rourkela Steel Plant who extended valuable support from time to time.
I am thankful to Mr. S. S. Majhi who diligently typed and retyped the manuscript in computer and finished his work in time.

This research work has been done primarily from an academic angle and not with a view to finding faults with existing practices and the persons associated with it.

Lastly, a word of thanks is owed to my wife Gitaniabi and son Swastig who have patiently stood with me during the period of this research.
