ACKNOWLEDGEMENTS

I extend my sincere thanks to Dr. G. Das, Professor of Mathematics, Sambalpur University for supervising the work. But for his valuable suggestions this work would not have been complete. My thanks are also due to the Journal of London Mathematical Society for publishing the second chapter of my thesis in vol. 12, p. 397-401 (a copy of the paper is enclosed at the end of the thesis for reference). I thank Dr. S. Pattanayak, Reader of Mathematics, Sambalpur University who has been a constant source of inspiration to me.

I am grateful to the Council of Scientific and Industrial Research (C.S.I.R.) and the University Grants Commission (U.G.C.) for offering me financial assistance to conduct research work. I am thankful to the staff of the Central Library, Sambalpur University for extending their helping hands to find out magazines and journals for consultation.

Sri K. C. Mistri has taken extra-pain to get the thesis typed neatly. I thank him for the trouble he has taken for me.

Shanti Lata Devi
