List of Tables

Table 2.1: Somatic Cell Count in healthy, acute and subacute mastitis samples.

Table 2.2: Result of Gram’s staining.

Table 2.3 (A-P): Results of Biochemical tests.

Table 2.4: Percent sensitivity of isolates against different antibiotics.

Table 2.5: List of bacteria isolated and identified from mastitis breast milk samples.

Table 3.1: Results of antimicrobial activity of three medicinal plant against four mastitis causing bacteria.

Table 3.2: MIC of different concentration (2000 µg/ml to 15.62 µg/ml) of herbal extracts of P. juliflora and D. stramonium against mastitis bacteria.

Table 3.3: Active component identification in extracts of P. juliflora by GC-MS analysis.

Table 4.1: Characteristics of the participants involved in the study.

Table 4.2: MG-RAST generated sequencing summary.

Table 4.3: Number of observed OTUs, phylum, Family and Genus classified in individual samples.

Table 4.4: Percent abundance of bacterial phyla in healthy, acute and subacute mastitis samples.

Table 4.5: Mean real frequency and standard deviation of top 30 bacterial genus represented in healthy-controls, acute and subacute mastitis sample.
