

TABLE OF CONTENTS

Chapter No.	Name of the Chapter	Page No.
1	Introduction	1-15
2	Texton based Shape Features on Local Binary Pattern for Age Classification	16-30
3	Evaluation of Shape Features for Efficient Classification Based on Texture Orientation using Fuzzy Texton Model	31-48
4	Fuzzy based Image Dimensionality Reduction using Shape Primitives for Efficient Face Recognition	49-71
5	New Method for Classification of Age Groups Based on Texture Shape Features	72-87
6	Texture Classification based on Integrated Method	88-100
7	Conclusions and Future Scope	101-106
	References	107-115
	Index	116
