

LIST OF TABLES

Table No.	Description	Page No.
Chapter-2		
2.1	Computed values of CGSF on ITLBP facial images for sample childhood images of FG-NET aging database	21
2.2	Computed values of CGSF on ITLBP facial images for sample adulthood images of FG-NET aging database	27
2.3	Comparison with Other Methods	29
Chapter-3		
3.1	Names of the Individual Textures of Brick	43
3.2	Names of the Individual Textures of Granite	43
3.3	Names of the Individual Textures of Marble	43
3.4	Names of the Individual Textures of Mosaic	43
3.5	Frequency occurrences of TSF on brick using TOFTBM	44
3.6	Frequency occurrences of TSF on granite using TOFTBM	44
3.7	Frequency occurrences of TSF on mosaic using TOFTBM	45
3.8	Frequency occurrences of TSF on marble using TOFTBM	45
3.9	Mean % classification rate of the proposed method	46
3.10	Mean % classification rate of the proposed and existing methods	47

Chapter-4

4.1	GLCM feature set values on FIDRSP model facial images	59
4.2	FIDRSP model-GLCM features of facial image: 001A05 for ten times	64
4.3	FIDRSP model-GLCM features of facial image: 002A26 for ten times	65
4.4	Recognition sequence of the facial images from the FG-NET aging database	66
4.5	Recognition sequence of the facial images from the scanned photographs	67
4.6	The face recognition rate by the proposed and other existing Methods	69

Chapter-5

5.1	Frequency occurrences of TSF of Bezier and U patterns on chin area of FG-NET ageing database based on FIDRSP model (chin area size 100×25)	78
5.2	Frequency occurrences of TSF of V and T patterns on chin area of FG-NET ageing database based on FIDRSP model (chin area size 100×25)	79
5.3	Frequency occurrences of TSF of Bezier and U patterns on forehead area of FG-NET ageing database based on FIDRSP model (forehead area size 130x35)	80
5.4	Frequency occurrences of TSF of V and T patterns on forehead area of FG-NET ageing database based on FIDRSP model (forehead area size 130x35)	81

5.5	Sum of Frequency occurrences of TSF on chin and forehead area in FG-NET ageing database	82
5.6	Comparison of the proposed TSF on FIDRSP model with other methods	85

Chapter – 6

6.1	Frequency occurrences of SP on ILDP-T on marble Texture	93
6.2	Frequency occurrences of SP on ILDP-T on brick textures	94
6.3	Frequency occurrences of SP on ILDP-T on granite Texture	95
6.4	Frequency occurrences of SP on ILDP-T on mosaic Texture	96
6.5	Mean % classification rate of the proposed and existing methods	99

LIST OF FIGURES

Figure No.	Description	Page No.
Chapter-1		
1.1	Vistex Database	12
1.2	Mayang Database	13
1.3	Akarmarble album, Ashishimpex album and Trade Key album Database	14
1.4	FG-NET aging database	15
Chapter-2		
2.1	Framework for the proposed CGSF-ITLBP age classification scheme on facial images.	20
2.2	Representation of LBP	21
2.3	Four special types of Textons: (a) 2×2 grid (b) T ₁ (c) T ₂ (d) T ₃ and (e) T ₄ .	22
2.4	Texton detection process: (a) 2×2 neighborhood sub image (b) Original facial image (c) & (d) Texton location and Texton types (e) Binary image of the face	23
2.5	Neighborhood topology used in this work: (a) circle (b) ellipse (c) parabola (d) hyperbola	24
Chapter- 3		
3.1	Rotational invariant texture classification based on TSF derived from TOFTBM	34

3.2	Fuzzy texture representation	39
3.3	Representation of (a) a 3×3 TOM neighborhood (b) fuzzy values (c) Fuzzy based TOM	39
3.4	Illustration of the Binary TOFTBM Matrix (a) TOM image (b) Detection of fuzzy values (c) Fuzzy texton mapping process on a 3×3 neighborhood d) Texture orientation Fuzzy Texton binary image	41
3.5	Representation of TSF on TOFTBM (a) TSF1 (b) TSF2 (c) TSF3 (d) TSF4 (e) TSF5	42
3.6	Classification rate graph of proposed method	47

Chapter-4

4.1	Block diagram of FIDRSP face recognition model	52
4.2	Preprocessing of face image (a) Original image (b) Cropped image (c) Filtered image	53
4.3	(a) a 3×3 neighborhood (b) Local magnitude matrix (LMM)	54
4.4	Construction of IDRSP model (a) LMM of a 3×3 neighbourhood (b) IDRSP matrix obtained from HVLSP's of LMM	55
4.5	Fuzzy membership function representation	56
4.6	The process of evaluating Fuzzy IDRSP model (a) sample IDRSP model (b) FIDRSP model	57
4.7	Bar graph for successful recognition rates of FG-NET aging database using FIDRSP model	68
4.8	Bar graph for successful recognition rates of Scanned images using FIDRSP model	68
4.9	Face recognition chart of the proposed FIDRSP model with GLCM features with other existing methods	70

Chapter-5

5.1	The TSF's of Bezier curves on a 5x5 mask with different control points	76
5.2	The TSF's on a 5×5 mask (a) U-pattern (b) V-pattern (c) T-pattern	76

Chapter-6

6.1	Integrated framework for texture classification using SP - ILDP-T	90
6.2	Representation of SP-one pixel intensity	92
6.3	Classification graph of the stone textures based on SP on ILDP-T	97
6.4	Comparison graph of proposed method and existing methods	99
