ACKNOWLEDGEMENT

Prima facie, I am grateful to my God Shiva, who was my Shield, my Fortress, Deliverer and the ever present help to me in the time of need. He let me go through the untrodden ways in a very simpler way. I am thankful to Him for granting me with the good health and wellbeing that were necessary to complete this thesis.

Words fail to convey my heartfelt gratitude and sincere appreciation to all people who have helped and inspired me during my doctoral study. My thesis would not have been possible without the support of following people:

My supervisor, Prof. Roopma Gandotra, I am thankful to her for the endless guidance she gave me during my research work at University of Jammu. I was extremely lucky to have such supervisor who cared so much about my work, and who responded to my questions and queries so promptly. Her perpetual energy and enthusiasm in research extremely motivated me in my studies. Every time, I meet her, I could feel “the fire in the belly” She made the research life very smooth and rewarding for me. She taught me how to dissect the challenges into as many different ways as possible and to look at them from different angles. Her smart ideas have helped me in planning the experiments, in analyzing data and in accelerating this thesis preparation.

Next, I would like to thank my grandmother Smt. Chanderkanta and my parents Smt. Rashmi and Sh. Ashok Gupta for allowing me to realize my own potential. Their infallible love and support has always been my strength. Their patience and sacrifice will remain my inspiration throughout my life. They taught me the value of hardwork. All the support they have provided me over the years is the greatest gift anyone has ever given me. Many a times, during my Ph.D, situations arose which demanded tough decisions and at that time my father’s hand was over me, trusting me and making me feel that I made the right decision. Without him, I may never have reached to where I am today.

A special thanks to my younger sister Aashana and brother Manish for their love and affection. Their confidence in me made me sail through my Ph.D with an ease. They made me live the most unique, magical and carefree childhood that has made me who I am now.

Particular thanks to my Husband Dr. Vikas Gupta for expecting nothing less than excellence from me. Through his eyes I’ve seen myself as a capable and intelligent woman who could do anything once I made up my mind. There are no words that can express my gratitude and appreciation for all that he has done for me. As I ramble, I still have not found the words that describe or express how I feel for this man and what his presence in my life has meant. He loves me like no one else has and has changed me for the better. Thanks to him with all my heart and soul. He is my biggest fan and supporter.
A special thanks to my family. Words cannot express how grateful I am to my mother-in-law Smt. Vijay, father-in-law Sh. Hansraj Gupta, brother-in-law Sh. Neeraj Gupta and sister-in-law Smt. Sindhiya and Dr. Dimple Gupta for all their kind support. Their prayer for me was what sustained me thus far. Special thanks to the little members-Karvi and Ridit Gupta who made me laugh during my stress, who considered Ph.D to be a homework and tried in every possible way to help me with their little albeit stronger brains.

I also owe my debt to the others teachers like Mr. Raghubir Gandotra, Mrs. Rita, Mrs. Shakti, Prof. D.N. Sahi, Prof. J.S. Tara, Prof. Arti Prof. Seema, Prof. Sanjay Bhatia and Prof. Sarabjeet Kour who in one way or other tried to show me the right path towards my journey.

My heartfelt thanks to my seniors Dr. Hina, Dr. Vivek, Meenakshi Koul, Rakesh Gupta, Dr. Shweta Gupta and Priya Manhas for their guidance and moral support. They always helped me out when I got any difficulties or queries regarding experiments. My special thanks to fellow lab mates Dalbir Singh Parihar, Rizwan-uzzaman, Ritu, Soniya, Divya, Sonakshi, Shivalika, Nipun and Monika for always standing by my side and sharing a great relationship as compassionate friends. It was great sharing laboratory with all of them during last four years and I will always cherish the warmth shown by them.

Completing this work would have been all the more difficult were it not for the support and friendship provided by, Sajjad, Anjali, Aarti, Neha, Monica, Anita, Bipu, Sonali, Ajay, Himani, Sonam, Ekta, Farhat and Subhu. They were fundamental in supporting me during the stressful and difficult times.

I am also thankful to the non-teaching staff members Mr. Suresh, Mr. Manu, Mrs. Neelam, Mrs. Kavita, Mrs. Sureshta, Mr. Harbans, Mr. Puranchand, Mr. Roshan, Mr. Rajkumar, Mr. Vishwanath and Dr. Surinder Sharma for their kind support and timely help whenever required.

Furthermore, I am very grateful to the people I have met along the way and have contributed to the development of my research. In particular, I would like to thank Mr. Sandeep, Mr. Vishal Mahajan and Vikas Mahajan (Honey Fish Company) who rendered the very possible help for the completion of my experimental work.

Finally, I must thank those people who cold shouldered me during my tough times. It was because of them that I realized the fire within me and did it myself.

Needless to say all omissions and errors are mine.

Vaini Gupta
