b. Carbohydrates, nitrogen and chlorophyll contents during grain filling

MATERIALS AND METHODS

GENERAL

1. Location
2. Seasons
   a. Kharif season (wet monsoon)
   b. Rabi season (dry)
3. Climatic conditions
   a. Solar radiation
   b. Temperature
   c. Relative humidity
   d. Sunshine hours
   e. Rainfall
4. Standard techniques adopted during the investigation
   a. Cultural management
   b. Observations at flowering
   c. Observations at harvest
5. Statistical analysis

EXPERIMENTAL

I. Variation in grain filling and grain density
   a. Varietal variation
   b. Grain filling pattern
c. Filled spikelet distribution and grain growth (mg grain\(^{-1}\)) at successive stages of grain filling 68

II. Factors influencing grain filling and grain density 69

a. Climate 69
b. Low light 69
c. Season and fertiliser level 70
d. Crop duration 71
e. Growth regulators 72
f. Defoliation 72
g. Translocation 72

III. Biochemical aspects 73

a. Phosphorylase activity during grain filling 73
b. Carbohydrates, nitrogen and chlorophyll contents during grain filling 74

RESULTS 78

I. Variation in grain filling and grain density 78

a. Varietal variation 78
b. Grain filling pattern 79
c. Number, test weight and percentage of different grades of grain 92
d. Filled spikelet distribution in panicle at different specific gravities 99
e. Grain filling and grain growth (mg grain\(^{-1}\)) at successive stages of ripening 104
II. Factors influencing grain filling and grain density
   a. Climate 107
   b. Low light 114
   c. Season and fertiliser level 124
   d. Crop duration 138
   e. Growth regulators 141
   f. Defoliation 147
   g. Translocation 149

III. Biochemical aspects 154
   a. Phosphorylase activity during grain filling 154
   b. Carbohydrates, nitrogen and chlorophyll contents during grain filling 160

DISCUSSION 177

I. Variation in grain filling and grain density 177
   a. Varietal variation 177
   b. Grain filling pattern 181
   c. Number, test weight and percentage of different grades of grain 184
   d. Filled spikelet distribution in panicle at different specific gravities 185
   e. Grain filling and grain growth (mg grain⁻¹) at successive stages of ripening 185

II. Factors influencing grain filling and grain density 186
   a. Climate 186
b. Low light 208

c. Season and fertiliser level 212

d. Crop duration 220

e. Growth regulators 223

f. Defoliation 225

g. Translocation 228

III. Biochemical aspects 230

a. Phosphorylase activity during grain filling 230

b. Carbohydrates, nitrogen and chlorophyll contents during grain filling 232

SUMMARY 241

I. Variation in grain filling and grain density 241

a. Varietal variation 241

b. Grain filling pattern 242

c. Number, test grain weight and percentage of different grades of grain 243

d. Filled spikelet distribution in panicle at different specific gravities 243

e. Grain filling and grain growth (mg grain$^{-1}$) at successive stages of ripening 244

II. Factors influencing grain filling and grain density 244

a. Climate 244

b. Low light 245
c. Season and fertiliser level 246

d. Crop duration 246

e. Growth regulators 247

f. Defoliation 247
g. Translocation 247

III. Biochemical aspects 248

a. Phosphorylase activity during grain filling 248

b. Carbohydrates, nitrogen and chlorophyll contents during grain filling 248

Overview 249
