CHAPTER 3  WATER QUALITY II

3.1. Introduction 33

3.2. Materials and Methods 34
   a) Salinity 34
   b) pH 35
   c) Dissolved Oxygen 35
   d) BOD 36

3.3. Results and discussion 36
   a) Salinity 36
   b) pH 38
   c) Dissolved Oxygen 40
   d) BOD 44

CHAPTER 4  WATER QUALITY III

4.1. Introduction 49

4.2. Materials and Methods 53
   a) Nitrite 53
   b) Nitrate 53
   c) Inorganic Phosphate 54
   d) Suspended solids 54
   e) Total organic carbon 54
   f) Mercury 55

4.3. Results and discussion 56
   a) Nutrients: Nitrite, Nitrate and Inorganic Phosphate 56
   b) Suspended solids 57
CHAPTER 5  PHYSIOGRAPHY AND FLOW CHARACTERISTICS

5.1. Introduction 68
5.2. The geological description of the region 69
5.3. Sand sample analysis 70
5.4. The longitudinal section of Muvattupuzha river 72
5.5. Structure of Muvattupuzha river 75
5.6. Rainfall 75
5.7. River discharge 77
5.8. Effect of tides on Muvattupuzha river 83
5.9. Water resources programmes 98

CHAPTER 6  DILUTION AND DISPERSION

6.1. Introduction 104
6.2. Effluent disposal 105
6.3. Dilution 106
   a) Proximity of river 107
   b) Mode of discharge 107
   c) Adequate water depth at discharge point 108
   d) Large quantity of diluting waters with high DO 109
   e) Strong forward currents 109
   f) Absence of back currents 110
6.4. Dispersion of waste in the water body
   i) Materials and Methods
   ii) Ist tracer study
   iii) IInd tracer study

CHAPTER 7 ORGANIC LOADING CAPACITY

7.1. Introduction
7.2. Self-purification
7.3. Deoxygenation coefficient $K_1$
7.4. Reaeration coefficient $K_2$
7.5. Study of DO deficits during the ambient survey using the coefficients $K_1$ and $K_2$
7.6. Prediction of downstream dissolved oxygen content on imposing organic loads
   a) The parameters of the receiving water body
   b) The parameters of organic waste loads
   c) Oxygen sag curves
7.7. Verification
   a) Case 1
   b) Case 2
CHAPTER 8  SUMMARY AND CONCLUSION

8.1. Introduction 145
8.2. The river regime and water resource projects 146
8.3. Industrial unit 147
8.4. Water quality 148
8.5. Physiography and flow characteristics 151
8.6. Dilution and dispersion 152
8.7. Waste assimilative capacity 152
8.8. Sludge disposal 154
