ACKNOWLEDGEMENTS

My deep sense of gratitude to my supervising guide, Dr. R. Mayasundari, Professor and Head, Department of Genetics, Dr. A. L. Mudaliar Post Graduate Institute of Basic Medical Sciences, University of Madras, for her proficient guidance which cannot be contained in words. Her constant encouragement through valuable suggestions during the entire course of the study has immensely instigated the materialization of this work. I am indebted to her for the patient understanding, inspiring discussions and unstinted support with out which it would not have been possible for me to submit this thesis and I shall cherish this memorable period of association with her.

I wish to thank Prof. P. M. Gopinath, Former, Head of the Department, Prof. A. Ramesh, Prof. S. T. Santhiya, Dr. R. Malathi, Dr. G. Jayaraman, Dr. N. Chandra and Dr. C. R. Srikumari, Department of Genetics, Dr. A. L. Mudaliar Postgraduate Institute of Basic Medical Sciences, University of Madras, Taramani, Chennai 113, for their encouragement.

I wish to thank the past and present Directors, Dr. A. L. Mudaliar Post Graduate Institute of Basic Medical Sciences, University of Madras for providing me the facilities at the Institute.

I express my sincere thanks to Prof. M. Michael Aruldhas, Professor and Head and other faculty members of the Department of Endocrinology for permitting me to use some of their instruments.
I am thankful to Dr. T. Jagatheesan, M.D., D.C.H., Dr. Chandralekha, M.D., Ph.D. and Dr. Meena, M.D., D.C.H., Department of Medical Genetics, Institute of Obstetrics and Gynecology, Egmore, Chennai; Dr. Kalpana Gowreishankar, M.D., Ph.D. and Mr. Ganapathy, Department of Medical Genetics, Kanchi Kamakodi Trust Children Hospital, Nungambakkam, Chennai for kindly referring the patients.

Also I would like to thank the Olympus diagnostics and Research Center for their help in providing me samples from normal children and adults. I am extremely thankful to my friends who had volunteered their blood samples.

I express my thanks to the patients and their family members without whose cooperation this thesis would not have been possible.

I would like to extend my thanks to all the members of the non teaching and technical staff, Department of Genetics, for their timely help and constant support. I would like to thank Mr. P. Ester Raj Soloman, for the technical assistance.

My whole hearted appreciation are due to my seniors Dr. E. M. Elango, Dr. S. Priya and Mr. K. Mahalingam and my labmates Ms. Prescilla Catherine and Ms. D. Hema for their help and encouragement.

I acknowledge the Lady Tata Memorial Trust, Bombay, India for financial support rendered in the form of Junior research fellowship.
I would also like to thank Students Xerox, Adyar, Chennai for the typographical help rendered in preparing this thesis.

I would like to express my deep gratitude to all my family members and teachers for their constant encouragement and support throughout my academic carrier. The love and care of my parents have been the motivating factor in all my endeavors. The moral support given to me by them has always helped me in coping with the hardships during the tenure of this work. I take this opportunity to express my love and gratitude to them.

S. JANANI
